

## Introduction/Overview

Dear Prof. J.B. Vermorken,

Enclosed are very serious materials sent to President Obama of the United States , and Prime Minister Harper of Canada. They concern fraud charges and unethical academic acts. There are allegations of malicious blacklisting/human rights violations, and the suppression of theories related to cancer, AIDS and evolution . A twenty year academic struggle . If Galileo were to approach you, would you offer to answer the ethical dilemmas ? You, and your journal, Annals of Oncology are approached because I read the fraud investigation of Hermann and Bach : more in the formal letter, and thought I saw ethical and honest scientists who could handle extremely serious issues. And in this capacity I am mentioning you to President Obama (see formal letter). Please note that the former U.S. Surgeon General, Dr. Jocelyn Elders sent me a letter regretting my treatment. Noam Chomsky of Boston College/Kyoto winner, replied to my email stating my new theory could be of phenomenal importance to mankind. Dr. James Lovelock, Royal Academy, GAIA Theory and adviser to NASA has reviewed same theory. My earlier work and cause of the dispute, and why I am blacklisted , was reviewed positively by Dr. G. L. Nicolson (then) of M.D. Anderson Cancer Centre. My name is Edward A. Greenhalgh who as an undergrad/grad in the 80s, 90s published three single author papers and was subsequently blacklisted . Please review the formal outline . Thank you.
