Dear Gilles Duceppe,

I am writing you as the Representative of the peoples of Quebec in that your response represents the spirit and values of that people. I am appealing to everyone's sense of Justice and Fair Play. Sir, I am seeking criminal charges against Dr. Douglas Wright of the University of Waterloo as outlined in the enclosed material to Prime Minister Stephen Harper, and President Barrack Obama (United States). Besides the serious legal discussion there is the matter of theory outlining another aspect of Global Warming /Climate change not considered,: emerging diseases , and these are a serious matter for everyone, whether they live in Quebec or around the world. The research has

been blocked by the malice and criminal culture of the University of Waterloo , and all I am trying to do is undo the harm so this important research can continue. So as the leader of people whom I believe share a common interest in justice and fair play , I am asking you request Prime Minister Harper to release the federal documents so they can be turned over to President Obama and the Dept. Of Justice so a criminal felony investigation can go forward, and to ask the PM to hold a criminal inquiry in Canada. Thank you .

Edward A. Greenhalgh
