Dear Mr. Layton,

I have suffered great lost due criminal actions of Administrators of the University of Waterloo who have covered up fraud and wrongdoing using the malice of suppression and blacklisting . Essentially , Dr. Douglas Wright lied in writing for a US NIH scholarship which is felony fraud. More importantly in order to cover up the fraud they violated my Charter of Rights and Freedoms to avoid the public exposure and embarrassment for blocking theories valuable to finding the answer to cancer and other ; plus consequential funding agencies investigations . There is no statutes of limitations for felony fraud committed against the US government, and , so , I am asking President Obama to begin a criminal investigation of Dr. Douglas Wright (see

enclosed material). To this I am asking Prime Minister Harper to release federal materials which shall support and prove said criminal allegations /investigation (see enclosed).

Mr. Layton the ramifications of my request are significant ,but also are the effects on society from the role of Big Business manipulating tax funded research programs to how ordinary Canadian students are cheated of a fair chance for positions and careers in science due a rigged scholarship program promoting the children of the Elite : nepotism over ability and merit. Since I believe these issues are of importance to many of your stated policies I am approaching you to request the Prime Minister have the Government of Canada release the requested documents for the criminal investigation. Any other help you could offer would be appreciated.

Thank you,

Edward A. Greenhalgh
