Title: Ethics ,Integrity and the  
 Accountability of Science vs.  
 The Generation of Private  
 Personal Wealth .

Is the Scientific Community Responsible to  
 Truth in Research and Justice for Society ,  
 or does it Owe itself to the Profits of Private  
 Interests? **\*Public Domain/Internet\***

Dear Prof. J. B. Vermorken :

You are approached due to a stand  
 on ethics re., Ann. of Oncology 9:1-6 , 1998 “ German  
 oncology research shaken by the fraud case of Hermann and  
 Bach . Note ,”but so too has the fact that it remained for so  
 long undetected,” and “young researchers working with them

in Berlin had suspected results were being fabricated but did not dare to complain for fear of jeopardizing their own careers.” Quotes from your journal.

N.B. By David Rising AP 2009 : Germany : 100 professors suspected of Ph. D. Bribes . “hundreds of students were involved and over a dozen German universities were under police investigation , but the important point was made by prosecutor Guenther Feld who said, “ the supervision of a PhD. . Thesis is a public service , and one is not allowed to take money for it .””

Prof. Vermorken, I have cited examples of wrongdoing balanced by integrity refusing to accept excuses, and is the reason I am approaching you with my very serious dilemma requiring ethics , integrity and a commitment to society of the highest order. Based on the articles in the Annals of Oncology you have been chosen.

My name is Edward A. Greenhalgh and I have an MSc. In Reproductive Endocrinology from the University of Waterloo Canada, who has blacklisted me in order to plagiarize my theories and cover up NIH scholarship fraud so an unqualified family member could get a scholarship to go to Yale . I published my undergrad research in Toxicology and my grad work in Endocrinology. And have been blacklisted ever since even though the University of Waterloo lied many times in writing , especially to regulators falsely claiming to have honest mechanisms to settle academic disputes. They asked me to get one “”competent”” professor to back my theories and when I brought them the man who invented the

theory, Dr. G.L. Nicolson , then of M.D. Anderson Cancer Centre, they simply said, you get your lawyers, and we'll get ours. And so we have had over twenty years of blacklisting. You can find more details on my website , [www.cancerfraudbadbiotech.com](http://www.cancerfraudbadbiotech.com) , and in the enclosed materials. Twenty years is a long time but what if my theories are as important as Semmelweiss' and germ theory, and the research must continue to help mankind ? Isn't that what GOOD scientists should be doing, helping better the human race to survive? Please read the explanation on evolution and new diseases as outlined to President Obama; it is quite serious. Noam Chomsky of Boston College/Kyoto winner thought the theory could be of phenomenal importance to mankind ! I can only continue the research by over coming the malicious blacklisting/suppression by exposing the fraud/corruption, and seeking the help of good people/scientists and the public.

Please note in the letter to the Prime Minister of Canada, Stephen Harper , I am asking that he release federal documents from the Ministry of Health who KNEW that research I was critical of at the University of Waterloo was/are described as being so bad that they are described as FECES. To be quite blunt , Prof. Vermorken, the Federal Government of Canada described the research at the University of Waterloo as “SHIT” !!!! In federal documents ! That is very bad! And proves NIH scholarship fraud . And why I was suppressed and blacklisted in order to cover it up. Federal DOCUMENTED evidence.

Please remember that it was Canada that lied to the world during the Blood Scandal and shipped contaminated blood all around the world infecting people with Hep C , and causing harm and death. And the federal Canadian doctors shipped it because they were afraid they would cause a profit loss for the corporation! Proven fact ! And the MANTRA of Dr. Douglas Wright and the University of Waterloo is the “generation of personal wealth”, and to have “millionaires walking the halls of academia .” All documented in the public domain/media . This is the culture I've had to deal with. I hope this isn't your culture too. So, why should you, in Europe care? The Government of Canada lied to the world about the safety of the blood products processed in Canada, so why shouldn't the Government of Canada lie about other things too : especially if they will suppress research theories related to finding answers to cancer and AIDS ? The Oil Sands are in Canada and the Government of Canada has very poor standards , and these bad standards affect YOU in Europe . **About standards, under Mulroney ,Canada signed the Kyoto accord, but the present government's commitment to it can be summed in the words of an Environmental minister (2007) Meeting Kyoto is Bad Economic Policy : Baird !**Canada could have better standards but given the JC.M. Riley “shit” standard accepted and promoted by the University of Waterloo and Dr. Douglas Wright , why should anyone expect any? Dr. Douglas Wright gave **DELIBERATELY FALSE SIGNED ASSURANCES** for the NIH scholarship ; deliberate lying with contempt for

regulations and what they stand for. And his friend and political associate , who made him Canada's Educational Adviser, former PM Brian Mulroney , his word is equally worthless if you see how much was accomplished with his “commitment” to the Kyoto treaty. So you can clearly see Canada's elite representatives can not be trusted in any assurances they give to the world. Especially when the emphasis is on personal wealth generation, NOT health and safety? And Dr. Douglas Wright is on public record as stating the solution to the garbage problem is INCINERATION ! So much for the University of Waterloo and any real truthful concern for CO2 build up and Global Warming/Climate Change. And the federal government of Canada's lack of concern and action on the subject. So any action you may choose to take can only help promote higher standards and a better world for everyone. And why it is still timely and appropriate for outside experts to become part of the solution to the long running problem . If men like Dr. Wright can be proven that their criminal and unethical acts won't escape exposure maybe, just maybe, their hidden political acts interfering with finding Global solutions will come to an end too.

To prevent solutions bad people try to make the problem appear overly complicated so solutions won't be found. Summary, the University of Waterloo committed federal felony fraud in applying for the J. C. M. Riley PhD. Scholarship money from NIH so he could go to Yale and work with Dr. H. R. Behrman. This was all planned years in

advance because Riley came from a privileged family . Unfortunately, Riley was incompetent and unqualified , but the University of Waterloo didn't care and lied in writing. They also committed many unethical acts to cover up the wrong doing. There are the criminal conspiracy charges as outlined in the letter to President Obama. Bottom line: They lied and then used their powerful connections to black list and suppress E. A. Greenhalgh so to cover everything up . Dr. Douglas Wright is a proven liar. And a felon for lying to the US government. I am asking for a criminal inquiry .However, the Greenhalgh research has all been vindicated and proven correct, so correct that the University of Waterloo plagiarized it and claimed it as their own. Very bad university. Bad federal government for conspiring with them . However, the research is not dead, but has very serious ramifications as explained in the Obama material, and requires public exposure of the corruption to continue on to help the public. Prominent public figures who have commented positively on my work and stand include : Dr. G.L. Nicolson of M.D. Anderson Cancer Centre ; the former U.S. Surgeon General , Dr. Jocelyn Elders; Dr. James Lovelock Royal Academy of Science, GAIA theory ,NASA adviser ; Noam Chomsky of Boston College and Kyoto winner ; plus others.

PARABLE INSERT : A Russian General who had defected to the West during the Cold War made this observation ; Russia deals with dissidents by sending them to a Gulag, while you in the West simply black list them and let them

starve to death from no work. The University of Waterloo with its political connections to the Canadian government has used this strategy against me and , worst, the research. All so they could enjoy private personal gain, and have millionaires walking the halls of academia.

Please read the formal letter to President Obama because it outlines how mankind may cause its own extinction in the next 50 years. So you see by reviewing my original research and showing the in depth chemical pathway answers I used to prove all my work , and how the University of Waterloo lied and used criminal actions to suppress SCIENCE , then that will lend credence to my new theories . You must surely appreciate the aim of black listing is to slander and malign the victim so no one will take them seriously ; like Canada and the Oil Sands and how they under mine the serious critics. I do not discount the fact of Global Warming/Climate Change , BUT state there is a much more serious under lying mechanism mankind must start to deal with IMMEDIATELY , not later as Canada has with its commitments to the Kyoto agreements , or go EXTINCT !

If you read the Prime Minister Harper letter , you will see that Canada harbours many Nazi war criminals, so lets pretend that I am like a political refuge running from a government with associations to the Nazis and have taken an ethical stand against them. I am now blacklisted and maligned by that regime ,and have come begging for your help. That is exactly the case in a nut shell. And my request is being made in the PUBLIC DOMAIN/INTERNET. Will you also take an

ethical stand and help ?

What are you being requested to do? To convene an ethical board of good scientists to review my original , blacklisted and suppressed, thesis versus the one I was forced by the University of Waterloo to accept and put in the public domain. Dr. J.C. Carlson, my former supervisor is dead, most likely by his own incompetence and contaminating the lab with the gamma emitter ,radioactive iodine, but that is not an obstacle. You see part of the web of lies made by the University of Waterloo was their false offer of my getting a competent professor to review the work . It was an unfair offer because they did not believe anyone of ethics would be drawn into the conflict, and a weaker prof would go along with what ever they told them to do. Dr. G.L. Nicolson was an ethical and good scientist who reviewed my research and gave it glowing support. The University of Waterloo simply said , you get your lawyers and we will get ours. Hardly a fair fight; billionaires against a kid from the boonies. So you see my analogy of Nazis chasing a little refuge is quite appropriate. So the original thesis is available in a verifiable form vs the corrupted thesis. Also, they said they would replace Dr. Carlson with Dr. N. Bols who was supposed to be honest , but because his grant was tied to Drs. Carlson and Thompson's he more or less was a conduit for their wishes to remove all the chemical explanations from the work. Think about it I explain oxidation mechanisms while their work requires the frothing of air through their membranes and they can't even comprehend the fact !!! So , although Dr. Carlson

is dead from cancer, Dr. Bols is not , and can be called in front of any criminal inquiry to answer under oath to give truthful answers.

POINT : think about it Prof Vermorken, a scientist, a professor at an academic university must be compelled under oath before a legal inquiry to tell the truth. Is this the new standard of modern science? Do you support that standard , you personally?

Honestly,the evidence will prove criminal fraud committed by the University of Waterloo for NIH funds , and all the subsequent unethical and criminal conspiracy actions that followed subsequently. And will support the arguments/theories being presented to President Obama of the United States, and maybe help save lives.

I have tried to make the issues as simple as possible. If you have any questions I may have left out, please contact me for further details. I can only close by saying I thought everything was originally a misunderstanding and once the proper authorities realized the work could help society it would be over with an apology and proper compensation. I was wrong. By approaching you I hope to find truthful honest scientists of integrity who will help right an injustice and help research of benefit to the whole world. I can't say anything more

Thank you,

Edward A.Greenhalgh
