Title:

Issues of Federal Concern
Prosperity vs Disaster

for Public Domain/Internet

tel. (202)-456-1414
switchboard

Dear President, Obama,

Your indulgence and assistance are asked regarding the extensive material of National Federal Concern, but the subjects are serious and appropriate to send to the President of the United States. Specifically, allegations of Criminal Conspiracy (legal definition) due corruption and criminal actions of the University of Waterloo (home to Research in Motion/the Blackberry) to commit criminal fraud for NIH federal funds then conspire to cover up the felony which may have caused the involvement of former President Bill Clinton. If President Clinton did not make it perfectly clear that the fullest extent of the law had to be used and the parties involved must be honest and forthright, then, as to the legal definition of the law, he may be deemed as a co-conspirator in the felony. Which then asks the question, does this also compromise his wife, your Secretary of State, Hilary Rodham-Clinton? A very serious question.

The material enclosed is serious and explains benefits to the world and yourself, however, up to now, I have been unable to overcome the malicious blacklisting and suppression inflicted by those conspiring to cover up the felonies to do the actual necessary research. The details are supplied, but I would like to make a personal impression first so you can see my sincerity and complete honesty. I greatly admire the great American actor, Jimmy Stewart for humanity and genuine goodness, but I identify with the Civil War hero, Joshua Lawrence Chamberlain. When I read "Killer Angels/Gods and Generals" there was a section where he was working the fields with his father when they hit a big rock, and Chamberlain asked what he should do. His father said, "move it." A similar event occurred with myself and my father, but to the bigger picture of life what it means, no matter how large the obstacle may be it will be up to you to change the situation: "move it." As to my actions regarding the criminal conspiracy allegations and approaching you I direct you to Chamberlain's speech to the Maine Mutineers as to why they were fighting the war, "... and for some it was the right thing to do,..." The Right Thing To Do! Not vengeance, not malice, but the right thing. That is why I am asking you for help in this serious matter. Please remember this when you review the enclosed material. Thank you.

Most Respectfully,

Edward A. Greenhalgh
