

## **CORRUPTION THREAT TO ECONOMIC RECOVERY AND SECURITY**

**Point of Fact : The United States Government gave funds to research described as “FECES” and the President of the University of Waterloo Deliberately Lied -Felony Fraud.**

The Whole Problem has been the Willingness of Federal Personnel to Accept Lying over Science Beneficial to the Taxpayer :Criminal Conspiracy.

As President and a Major World Leader, your Decisions **MUST** be made based on completely dependable Information! If the information is corrupt ,YOUR decision will be **WRONG** ! EXAMPLE: **WMDs!!!** President Obama, after the near disaster of the attempted Christmas airliner bombing you said the system needed to be fixed,well , sir, use my case as a powerful DETERRENT proving that you will not accept the substandard, cronyism,or any corruption , and anyone who participates in federal programs **MUST** be truthful, honest and in complete compliance with , not only the full letter, but the SPIRIT of the program as well and be ready to be held **FULLY ACCOUNTABLE** with the enforcement of the law and penalties : the strongest DETERRENTS you have available to ensure the success of your mission. Favouritism will not be acceptable, nor any other excuses.

**Research Centres that cheat steal from the Health Care System keeping costs high : cheaters hurt people.**

POINT OF FACT EXAMPLE; as of August 2009  
Reproductive Researchers working with stem cells in the UK  
have retracted their work admitting plagiarism and  
misconduct. I was blacklisted by reproductive scientists  
because they feared I would expose misconduct in the US ,  
Canada, and the U.K. Lying , cheating and misconduct by  
Reproductive Scientists is very bad and harms everyone.

POINT in FACT: blocking cancer research, any medical  
discoveries, increases the cost of health care. And if the  
pharmaceutical industry was involved with the University of  
Waterloo to do this, then there are other very serious issues  
that must be answered. Including the acts of Criminal  
Conspiracy which came to involve federal U.S. Personnel.

**PRECEDENT : U.S. Researchers INTENTIONALLY  
infected hundreds of Guatemalan mental patients with  
STDs without their knowledge or permission more than  
60 years ago!**

**Dateline October 2010 : Sec. of State , Hilary Clinton and  
HHS Sec. Kathleen Sebelius offered extensive apologies  
for actions taken by the U.S. Public Health Service.  
Admission of past wrong doing by PHS: credible  
precedent.**

**Part of the present problem presented by Greenhalgh is  
that the PHS may have entered into a , legal definition ,  
Criminal Conspiracy to cover up wrong doing by the  
University of Waterloo :felony scholarship fraud.**

## BAD MENTORS AND BAD LEADERSHIP

Madoff, Skilling, Abramoff, and TOO many others are examples of bad mentors and public leaders whom have misused their privileged positions of authority and power to cause society harm. Just because someone is in a position of power and authority over anyone does NOT make them automatically a good mentor , nor forms any kind of guarantee from corruption. Who were the “mentors” to the Lehman Brothers and other bankers who received bailout money? What happened to the people who spoke up warning the SEC? They were forced to retire or quit: what kind of “mentoring” is that? Bad people must be “checked and balanced” by honest regulators. Up to now, the University of Waterloo has laughed at the U.S. Regulators at PHS, unless they are in their “pockets”, which the evidence may allege. Unless you enforce the law, can the American taxpayer believe you are doing your job?

**POINT OF FACT EXAMPLE:** Madoff has stated that he was interviewed several times in the past by SEC officials , and each time he felt that the “jig” was up and he was going to be caught. He wasn't and he continued on with his Ponzi scheme to harm many more people that he should not have. A few people tried to warn the SEC , at risk to their own careers, but the SEC refused to listen: greed and self interest blocked their hearing. With the Nigerian airline bombing near disaster, the US had many people come forward to warn US officials who did nothing but misplace or lose the intelligence, and doing nothing is the worse thing you can

do if you wish to avoid disasters. President Obama there is an abundance of written , documented material I have sent to the U.S. Government over the years (PHS/NIH/FDA/ORI/DOJ/FBI plus others) and there is a recurrent theme of avoidance and denial, just like with Bernie Madoff and the Nigerian bomber. Now, Sir , you must consider the potential harm if the research is ignored. Like, Madoff , like the personnel given info on the Nigerian Christmas airliner bomber attempt; like the failure to ensure safety standards for Oil Drilling in the Gulf; or ... :you can act and prevent harm, or let disaster run its course; now the choice is **YOURS!**

POINT in FACT: August 2009 Germany, 100 professors charged with fraud for granting Ph.D.s in return for bribes. The University of Waterloo-Yale scholarship fraud is the same thing but required lying to the U.S. Federal government. A Criminal Conspiracy.

**IMPORTANT EXAMPLE: Priests molesting altar boys.**

Douglas Wright, mentor to RIM (Research in Motion,the Blackberry), multimillionaire who sat on many boards of directors in the US, Canada, and the UK , former President of the University of Waterloo, is a proven liar , cheat and corrupt businessman. He is a bad mentor to society and the education system. And he is proven to have lied in writing for NIH funds with premeditated intent : felony fraud. Worst, he violated the SPIRIT of the very federal programs to which

he was giving deliberately **FALSE SIGNED ASSURANCES**. And even worst still, by doing so, he suppressed research valuable to and paid for by the taxpayers. Research that could have helped to reduce the cost of health care. Part of that research is why I am contacting you.

Why should you care ? The future lives of your children, and all of mankind's children are at risk: if you do not act on what I will explain to you, there may not be a future for anyone. Who, in heaven's name am I to make such a claim? A person so important that Douglas Wright and the combined influence of the Universities of Waterloo and Yale was used to blacklist and suppress me. To prove my credentials I must demonstrate the malice and corruption of my detractors. My research has been vindicated, and my new research theories indicate that the coming environmental crisis will make the financial crisis inconsequential; and so must be avoided( it is still avoidable if the world chooses to act together).I have emphasized that Douglas Wright as a man of considerable financial and political influence is a liar and cheat , who out of malice blocked research and violated my human rights: he had a choice , and you must realize he **CHOSE** malice and corruption/felony acts.

**Historical Perspective: The Tuskegee Airman.**

It was “scientifically proven” that Afro-Americans were physiologically (subhuman) incapable of being pilots: a lie paid for by special interests. Therefore, you should appreciate the power that **MALICE** and corruption have over scientific results and institutions. Should someone have stood up and challenged the funding; and been black listed

and lost their career? Roosevelt promoted the airmen so they became part of history. Good for Roosevelt. Based upon my upbringing I have stood up for truth and ethics and up to now have been black listed and career damaged. The research has been vindicated, so are you equal to Roosevelt? I am asking you to review my theories and proposals.

And now you have reversed the decision on federal funding for embryonic stem cell research and have turned to PHS/NIH personnel to set the ethics standards for this research. Excuse me but Embryonic Stem Cell research is part of Reproductive Endocrinology , and I AM a published Reproductive Endocrinologist who has been suppressed and blacklisted with the help of some of the very people to whom you are now turning to set ethical standards?!! Why won't they act unethically now as they have in the past; many have been proven to have lied in order to cover up plagiarism and academic fraud involving US federal funds , and the fact is that there is NO statutes of limitations for federal fraud committed against the US federal government! Are these people you are proposing to set guide lines prepared for a TEST in the public light to see if they are up to the job. After all with your recent Education Initiative you have declared that you are not going to accept substandard teachers; does this also apply to federal personnel responsible for ethics and human rights ? Or will your administration be the equivalent to the one that allowed the Tuskegee syphilis experiments to go on for years after the results were in , only because the people being studied were deemed to be of little worth to society. Is this the earmark of

your administration too? **As of 2010 Sec of State Hilary Clinton has apologized for a US funded syphilis experiment in Guatemala 60 years ago..** Will they (your present science advisers ) answer the simple questions of 1] is lying for money, fraud?, and 2] is research described in official documents in derogatory terms as FECES, EXCELLENT? Y/N?

August 2010 U.S. Court Rules Against Obama's Stem Cell Policy : part of the lawsuit came from scientists (Drs. Sherley and Deisher ) who work with adult stem cells who claim harm to their work by increasing competition for limited federal funding. Fact, review my research proposals for the early nineties and there is “you could grow your own organs” statement explaining how somatic cells could be used. In fact I met with Dr. Rao of the U of Kentucky and part of my cancer theories involved stem cells etc. Louisville is now claiming stem cell advances, but that is much more than a decade later. Dr. Rao, I claim was influenced by U of Waterloo or the American government to enter into the criminal conspiracy to cover up federal fraud committed by Yale and Waterloo. How can you prove that? Ask Dr. Rao to answer publicly whether research described as feces is excellent, and if lying for money is fraud? To publicly answer the questions. You could call him before a Grand Jury and ask more questions, but the RELEVANT point is ADVANCED COMPETITIVE research was held back so private individuals could experience personal gain from federal funding agencies. The agencies under PHS and NIH. So UNFAIR COMPETITION is A VERY VALID claim and quite

provable. Worse, funding new research isn't the aim of using federal monies, its pleasing private cronies and private interest gains. Proven, the tax payers funding NIH are being cheated by the very agencies that should be safe guarding them. Tell Michael J Fox , his public calls for cures for his disease have been misused and he is suffering for nothing. The breakthroughs he claims he wants have been held back for bad reasons. So President Obama , it is time you personally take a look at the very guide lines you are claiming will help the American taxpayers : it is a good time for a thorough review. No excuses.

Is this fair? Is paying bonuses to AIG executives fair? The public thought not and you said you would like to see the money returned. Do you really want advanced and safe science benefiting society or are you going to continue corrupt practises of cronyism? If you want the best then you have to know you are getting the best; therefore, unlike AIG , you now have the opportunity to make sure all the writing is checked before you go ahead and give away federal money. You can truthfully assure the taxpaying public that you have (this time )covered ALL the bases and answered all the questions before you proceeded. That is why my case and public examination IS important to your administration and the taxpayers' of the United States.

Precedent : Avandia and the "RECORD" study. As of July 2010 the FDA may pull the diabetic drug, Avandia off the market. There are talks about hidden results kept from the public. This is EXACTLY the situation I am in with the University of Waterloo and Yale. Please note as you investigate deeper , you WILL find correspondence I had

with the FDA also. Please note, unlike the "RECORD" data, which many say is confusing, I was quite clear and to the point. I had repeatable experiments that were SIMPLE and CHEAP to do , and would have proven wrongdoing.

Apparently, the Federal Government of the United States did not want such. I can only ask , WHY ? The Federal Government of the United States is supposed to be watching out for the interests of the taxpayers and consumers , not billionaires who are lying to the federal government. Maybe this is why dangerous drugs, like Avandia (also, Hemasol etc etc ) are able to get on the market to harm people in the first place. And it is a good reason to help me now and lay the felony criminal conspiracy charges to DEMONSTRATE to the American Taxpayer and Consumers who's side you are really on.

**Can President Obama be Bought by Special Interests?**

As a good and honest person you will only be bothered that the question had to be asked so that an injustice could be corrected; if you aren't, it doesn't really matter, does it? The question is asked so the public can judge all parties and see if TRANSPARENCY and ACCOUNTABILITY are being applied: they do not want their tax dollars misused any more. The Tuskegee airmen and the syphilis experiments have been cited as precedents but lets use other examples to connect everyone. Dr. Devra Davis in her book, "The Secret History on the War on Cancer," notes two events where money interests were put ahead of American lives by the government(private agenda/gain over the public good).

- 1.The (then) secret formula for leaded aviation fuel was

GIVEN to the Nazis by an American company with ties to the U.S. Government. No one was ever tried for treason though a serious crime was committed. So how many American Service personnel of all ethnic and racial backgrounds died who did not have to ?The public must consider the question. 2.American scientists KNEW that WWI mustard gas affected the white cells of the body, and this would become the basis of chemotherapy BUT the U.S. Government kept the research classified/secret until the late 40s. Again, how many Americans died that did not have to?

What has been established is that federal U.S. Government personnel have allowed criminal and unethical activities in the past that were not in the best interests of the American public and taxpayer. Factual documented precedents. And no one was ever held accountable. Therefore, my present day claims of wrongdoing by U.S. Federal personnel to obstruct justice and cover up wrongdoing ( to be part of a CRIMINAL CONSPIRACY) are very reasonable. And since I am a Reproductive scientist and Embryonic Stem Cell research is a field of Reproductive research then my concerns are very appropriate to bring to you since you wish to establish standards and ethics for same. Nothing sets standards like examples of wrongdoing being examined in the open light of the public domain. And even more pertinent is the question, Can President Obama be bought by special interests and who could influence a President?

Answer: the Government of Canada , the Universities of Waterloo and Yale, and Trevor Eyton of U of Waterloo and of

Brascan (electrical grid company division) and Douglas Wright who sits on the board of directors of companies in the U.S.(Com Dev), Canada and the U.K., and the Research in Motion (RIM company : the Black berry).And these people cause federal personnel in Canada and the United States to lie (conspiracy per legal definition) and obstruct justice in order to cover up scholarship felony fraud for numerous reasons : all for private agendas and gain ,not in the best interest of the public good or the taxpayer.

**Brief Example how Corruption of the Past can Impinge the Obama Government's Integrity.**

Bill Clinton visited the University of Waterloo as President of the United States. Was he paid for his appearance? Did the money go to his foundation? Does this make President Clinton the same as Representative Charles Rangel and the ethical compromise/corruption controversy he is in ? How is Clinton different from Rangel ?Any obligations he may have accrued for this money to the University of Waterloo are they now inherited by your Secretary of State, Hilary Rodham-Clinton ,and does this compromise her position to you? Does this mean that the Secretary of State may be part of a **CRIMINAL CONSPIRACY** as per the legal definition ?Does this question necessitate a **PUBLIC INQUIRY** before Congress? Taking private money from private interests compromising anyone's service to the taxpayer is a little like taking money from the Mob or the Devil, your soul is theirs for as long as you are in office and the public can never be sure who you are working for. That is the problem with conflicts of interests.

Specifically to you at the moment ,President Obama,part of your recovery plans are to rebuild the power grid in America, well Trevor Eyton is part of a large company that already receives hundreds of millions of dollars to do that in the U.S. now. So who are you loyal to? The federal law and federal regulations or personal agendas of Trevor Eyton and his cronies and their private wishes ( to obstruct justice and cover up)?Can you begin to see the complexity of the problem?

No Statutes of Limitations for Fraud Committed Against the U.S. Government:The Clinton Connection Years. Concerns involving Criminal Conspiracy are Presented .

Point of Fact: Research in Motion key Board of Directors, Douglas Wright , Mike Laziridis, and Jim Balsillie plus others were fined over 77 million by the OSC in 2009 for unethical business practises dating back to 1996. HISTORICAL PRECEDENT ! Wright was removed from the Board of Directors as part of the clean up. FACT: Douglas Wright has always had political connections (like backroom Chicago style politics as practised by former governor Blagiovitch) [aside from his business positions in Canada, US and UK] being an UNELECTED cabinet minister of the Bill Davis Government (named a library after him at UW).He was Educational Adviser to former P.M. Brian Mulroney's federal government circa 1988-92. He had considerable political influence across a wide sweep.

Important Insert:PM Mulroney has recently been questioned in 2009 on tax fraud evasion, and because of Canada's

lenient fraud laws and cronyism he can not be prosecuted. The speculation is , had he been subject to American law he would have gone to prison. Another difference, Madoff gets decades in jail, the Canadian fraud duo behind Lievent who defrauded millions get only 15 years combined. Norburg which defrauded thousands of investors of millions of dollars faced a trial of over 700 charges and thousands of pages of documents ended in a mistrial January 2010. Some allege this may have been done on purpose so the judge will not ask for the charges to be re-laid. So you can see why Douglas Wright would have such a cavalier attitude to committing fraud.

**POINT OF FACT:** Jim Balsillie ,CEO of RIM and an acknowledged protege of Douglas Wright has been declared “untrustworthy” by two American businessmen in depositions given in bankruptcy court regarding a sport team conflict where Mr. Balsillie was trying to buy a team. You must further note that the NFL sports league was also philosophically opposed to Mr. Balsillie. And of further interest, the RIM contract procedures in Canada for its employees is questioned as being in violations of human rights principles. This must be seen as the “spiritual” direction ,or ethical lack that can be traced all the way back to the former head of the University of Waterloo, Douglas Wright. In summation , I've had to deal with people that society publicly acknowledges to be unethical and untrustworthy. That must be seen as very significant in your considerations .

The important (time period) connection of Brian Mulroney, Douglas Wright, and Bill Clinton is the Centres of Excellence scheme and the Tainted Blood Scandal. The Tainted Blood was processed in Canada using contaminated blood from Arkansas Governor Bill Clinton's prisons to make money for a private company: that is why the Canadian doctors in charge refused to stop shipping the blood (profit loss). Hence is shown a chain of connections and familiarity ("6 degrees of separation"). A link to Criminal Conspiracy .

Point of Interest : the great American science fiction writer, Issac Asimov died of AIDS as a result of a blood transfusion during his heart operation. People all over the world suffered .And Douglas Wright's mantra for the Centre of Excellence scheme was , " millionaires wandering the hallways of academia." Not cheaper healthcare or new medicines , nor high safety standards, but the acquiring of personal wealth. The very mantra that caused the housing-credit bubble that has hurt America so much right now. And Americans are starting to ask, "where is the Obama recovery?" Where is the leadership?

Public Fact: after a lengthy trial where it is speculated that the officials deliberately lost critical pieces of evidence , or it was ruled inadmissible, no one was ever held accountable for the deaths and harm(from the Tainted Blood), and all were acquitted. Wrongdoers appear to be protected by the federal authorities who are supposed to be enforcing the laws and regulations. Repeat; no wonder Douglas Wright has

such a cavalier attitude towards committing fraud. Second point, what does Bill Clinton feel he's obligated to the Canadian federal government for over this affair? To the University of Waterloo? Is the protection of former President Bill Clinton a basis for criminal conspiracy allegations ?

At the very same time as the University of Waterloo was committing NIH scholarship fraud for J.C.M. Riley , Yale was prosecuting a young man who fraudulently acquired scholarships to go to Yale: he had done very well academically and his only mistake was telling everyone publicly and saying Yale wasn't so hard. Yale was threatening him with prison and lawsuits if he didn't return the money etc., etc. So to have The University of Waterloo scholarship fraud become public at the same time, with a prominent Prof. Dr. Behrman of Reproductive science indicted for plagiarism etc would have knocked the wind out of Yale's sails, and the young man may even have counter sued for many millions of dollars. Basis for a conspiracy (involving the federal government)to obstruct justice and a conspiracy to cover up. Motive.

Famous Yale alumni: Bill and Hilary Clinton, George Bush, Dick Cheney (didn't graduate but stayed out of Vietnam) and Supreme Court Justice Sonia Sotomayor(Yale law school). Since human rights and civil justice are involved, we must ask Justice Sotomayor if lying for money is fraud? And if research described in official documents as being so bad it is compared to feces, is excellent?to receive scholarship money to go to Yale? Historic precedent: Afro-Americans

and Hispanics were often denied justice because no one would stand up for them and enforce the law truthfully and fairly; all I am doing here is giving President Obama and Justice Sotomayor the opportunity that everyone says was so easy to do in the past but racists wouldn't allow people to because of social pressure. The only pressure here is to cover up federal fraud/ criminal conspiracy which may involve prominent American politicians. I have asked everyone this very same question for several years now, without prejudice to anyone's background.

**POINT:** At the same time that U of Waterloo President Douglas Wright committed federal fraud by lying for J.C.M. Riley to receive the fraudulent NIH scholarship to go to Yale where he and his sponsor , Dr. H. R. Behrman could plagiarize E.A. Greenhalgh's research , Yale was also involved in another fraud, the Vineland Map Fraud. Yale professors had been scammed into believing a fraudulent map of viking origin was real . Yale staked its reputation on it. Facts indicated otherwise, Yale would take the matter to court etc., to save face rather than admit scam. This is a very important historical precedent because Bill Clinton, George W. Bush and Dick Cheney are all Yale alumni more or less, and several years later false maps, photos, and documents will lead the American public in the search for WMDs into war with Iraq. This demonstrates very clearly the effect of fraud and false assurances and the very real harm that does follow. Lying does hurt people and real harm does result , so lying should not be covered up and go unpunished. Douglas Wright is a liar who suppressed cancer and AIDS research for personal pleasure and gain. The US government in its

quest to protect Yale has suppressed research of VERY serious consequence to the future security of the American people and the world. Lying hurts real people! And proves allegations of criminal conspiracy as per the legal definition.

**Precedent : Corporate Fraud vs. Private Citizen Fraud.**

It is alleged that the U.S. Government refused to prosecute J. C. M. Riley for the NIH scholarship fraud because rich politically connected people from Yale and Waterloo influenced (legal definition of criminal conspiracy ) former President Bill Clinton and/ or his government NOT TO. People of privilege over-ride the law. This must be seen in CONTRAST to Adam Wheeler who in May 2010 is being CHARGED by Harvard (your Alma Mater, President Obama ) with faking his way in,"FALSELY " MAKING CLAIMS FOR FINANCIAL AID , GRANTS AND SCHOLARSHIPS! Gee, what is the difference here ? Riley vs. Wheeler. Riley had political and financial connections. Are you going to STAND for this President Obama ? Or are you beholden to the same financial and political cronies that protected Riley in the first place, and may have caused former President Bill Clinton to enter into a Criminal Conspiracy ? Will you become part of the Criminal Conspiracy ?

**RESEARCH AND THE PRINCETON EXAMPLE:**

Looking for justice and to promote the research I have been in contact with many, many people. One such person was Dr. Shapiro of Princeton whom Bill Clinton appointed as an Ethics Adviser on an Ethics Commission for the United

States Government. The fact of the matter is that Dr. Shapiro replied to my concerns regarding the fraud and plagiarism in a do nothing fashion: "your concerns have been noted in committee" or words to those effect were sent back to me. Please note the many people , including pharma who said my research appeared important but , they did not do research in Canada. So why not do the research in the US and benefit Americans? Dr. Shapiro had this information available to him and his committee but he was uninterested. Why? It must be noted that a short while later Princeton was involved in a scandal with Yale. Apparently, someone in Princeton's administration hacked into Yale's computers in order to get the names of students eligible to receive scholarships. The allegations were that Princeton was interested in the money these students could bring. Have we answered the question why Dr. Shapiro wasn't interested in the research I was offering? And he was a President Bill Clinton's appointee. Documented facts. So he should be given the public opportunity to answer the questions of : is research described as feces , excellent? Y or N ? And is lying for money fraud ? If he was pressured by former President Clinton, then the allegations of criminal conspiracy may have more serious consequences. Or, did he simply tell Yale to drop the matter against Princeton , otherwise he would have the charges by Greenhalgh publicly investigated : did he use black mail against Yale? All very serious allegations, wouldn't you agree, President Obama ?

**WHO ELSE IN THE AMERICAN GOVERNMENT LIED ?**

The question is very important because part of the Criminal Conspiracy was to escape accountability and justice by outlasting the statutes of limitations law : if they weren't held accountable in time then they would never be .The allegations become that politicians (possibly, former President Bill Clinton ) in the course of a Criminal Conspiracy ordered/ implied/hinted or WHATEVER caused Federal U. S. Personnel responsible for enforcing federal law and regulations not to do their jobs so NO ONE ; The University of Waterloo, Dr. Douglas Wright, Dr. J. E. Thompson , J.C.M. Riley and others would not be charged and the WHOLE thing would just disappear in TIME . So part of the Criminal Conspiracy was not to do a proper job and ignore evidence ,regulations and anything : to simply dismiss the whole thing.

OBVIOUS QUESTION : so what good is any apology by Sec. Of State Hilary Clinton and HHS Sec. Kathleen Sebelius made this fall of 2010 regarding the US syphilis experiments and the mental patients in Guatemala 60 years ago?

ETHICAL CRIMINAL INSERT : Douglas Wright is a friend to former PM Brian Mulroney who just beat the rap for Tax Evasion because of his old employee, President of the University of Waterloo David Johnston would not allow a public inquiry ask questions regarding criminal actions . This must be seen as professional obstruction of justice. Johnston was chosen to replace Douglas Wright. Douglas

Wright has been investigated by OSC for unethical action regarding his participation on the Board of Directors of Rim and with holding income etc etc dating back to 1996. Douglas Wright also sits on the board of American companies such as Com Dev receiving income from American based sources. Precedent, another Canadian found guilty of felony acts by an American court is Conrad Black (especially obstruction of justice) . Black is now being investigated by the IRS for TAX EVASION. I strongly suggest given how Brian Mulroney simply decided NOT to report income , and he is good friends with Wright , and Wright has been found wanting for wrong doing with COMPENSATION by the OSC there is a BASIS with Wright's ARROGANCE and belief he is ABOVE THE LAW that he may have pulled a “Mulroney” in reporting his American income . So given I have proven Douglas Wright to have already LIED (in writing ) to the American government for money and believed he could evade justice through friendships and Criminal Conspiracy, the IRS should THOROUGHLY REVIEW Douglas Wright as they are Conrad Black. END OF INSERT

And part of the Criminal Conspiracy is to try and make everything too complicated to follow to a conclusion ; therefore, I will NOT provide the excess of information / evidence as I have in the past. The huge bulk of evidence is already available to you through the auspices of the DOJ and PHS and the public can see much of it on my website too. Any missing pieces will be supplied upon request. So to be brief only a specific few will be high lighted to support the allegations . They are : \*\*\*\*\*

1. Insp. Gen. June Gibbs-Brown

2. DOJ Deputy Chief Jo Ann Farrington, Dept. Of Public Integrity

3. Mary C. Spears and John Dockery of CD Fraud Section of Investigation

4. Director Duane Alexander of Natl Inst. Child Health and Human Develop.

Deputy Chief Jo Ann Farrington , I quote, said ,”and what wrong doing did they do?” Excuse me, but lying for federal money is felony fraud!!! BUT what is worst, (and noted later) is that Yale (2009 )“Yale WINS MILLIONS of dollars in funding for ovarian cancer research. You have to read all my research proposals but when you start adding up the money you will start to reach billions and to that you have to add ALL the cancer deaths. Wright by lying for US tax dollars has caused greater harm than can be first imagined. So what crime did Madoff commit? If you stopped him at the first fraud would it have stopped the BILLIONS ? It is called the deterrent effect of the law, and is what the public depends on the law officials to enforce for their good. How did this person get to be a deputy chief of the Department of Justice ?

Culture of Lying and Cheating for FBI Precedent :

28 July 2010 FBI Director Robt Mueller defends FBI (before Congress) over Test Cheating ,he does not know how many agents cheated on an IMPORTANT exam on bureau policies ,... , and raises questions about whether the FBI knows its own rules ,....., and Mueller doesn't know how wide spread the problem is . Mr. President if the FBI will cheat on civil liberties of Americans on surveillance, why

wouldn't they enter into a Criminal Conspiracy to cover up criminal fraud by academic institutions since they have no problem with cheating on tests ?

Chief Mary C. Spears and Investigator Dockery said they had investigated and could find no wrong doing. Excuse me, but he received the COURIER material on a Friday and made his decision on the weekend (what government employee works on weekends ?) : the very weekend that Former President Bill Clinton and Newt Gringrich had their fight which closed down all the federal offices/services .You will find this discussed in material dated 20 Nov. 1995 citing "BUDGET FURROUGH.." How did he request any(thing) information, especially the material I have only discovered to be with held by the Government of Canada. This lays the foundation for a very STRONG allegation that the federal personnel has LIED in writing ! A serious felony since charges of felony fraud have been OBSTRUCTED by these actions. And this goes farther to the allegations of Criminal Conspiracy : had he acted under ORDERS from former President Bill Clinton, himself ?Did former President Bill Clinton order the U.S. Inspector General , June Gibbs-Brown to cover up the felony and close the investigation to protect Yale and Waterloo universities ?A very serious allegation , but quite provable when all the participants are REQUIRED to answer the questions : 1. Is research described in official government documents as FECES, excellent? Y/N ? And is lying to the federal government for money, felony fraud ? Y/N ? The answers are obvious !

**LEGAL PRECEDENT** : Rep. Charlie Rangel says he's not guilty of any ethics violations under the 2010 Ethics Investigation because all monies he received from corporations, foundations and wealthy donors went to the Rangel Centre of City College NY Foundation to support academic programs in public service. If former President Bill Clinton was receiving, or the **INTENT** of a **PROMISE** (“something down the road”) of monies or donations for the future to any foundation he may establish, **HOW IS BILL CLINTON ANY DIFFERENT THAN CONGRESSMAN RANGEL.?**

And Director Duane Alexander who could not find wrong doing, why hadn't he requested the federal material which states the Carlson Riley research to be so bad its **FECES** ? This would strongly support the allegation that he was acting in a **Criminal Conspiracy** to cover up wrong doing from felony fraud , to others.

**BUT** an Inspector General of the United States being **DERELICT OF DUTY** and involved in a **CRIMINAL CONSPIRACY** : that is very serious. And was it at the behest of former President Bill Clinton ? Even more serious !!!

The official documents that I have requested PM Harper to release describe the research that was used to request US Federal funding as **FECES** !!!! **FECES IS NOT EXCELLENT** ! This proves that the University of Waterloo signatories, Dr. Douglas Wright and Dr. J. E. Thompson lied in writing. They lied for federal US monies and **THERE IS NO** statutes for felony fraud committed against the Government of the

United States. And the deterrent effect of enforcing the law helps to protect the people of the United States. President Obama you are beholden to the American taxpayers and voters and public in general to ASK the four above named (Inspt. Gen. Etc ) why they didn't cite these papers (material evidence) in their findings as it CONCLUSIVELY proves felony fraud . Now it serves to PROVE CRIMINNAL CONSPIRACY TO OBSTRUCT JUSTICE . And now the documents have been made known to you, President Obama , and as such with the serious allegations demand a full Federal Criminal investigation ! That is , unless you had discussions with PM Harper at the G20 regarding the same and promised not to , then you are part of the Criminal Conspiracy as defined in law. I truly hope that is not the case .

And there is more, but that would complicate matters , and the concerns need to be kept simple so a NEW PROPER Criminal investigation can be started . The above are very serious and demand federal action/response . You, sir , have been made aware.

But why do any of this ? One, they are criminals and as such are bad for society, isn't that enough ? Two, they black listed me and suppressed the research, and if they hadn't done this, I would never have uncovered any of the material proving all the wrong doing. I would have gone on to do the research; so if you want to “blame” anyone for me contacting you this way, BLAME the criminals . Therefore, to continue the research I have had to overcome all the wrong doing and

oppression. That is why.

Why should you do this? It is the RIGHT thing to do , and because of the research and what it may lead to .

My research proposals are public domain and serve to prove what I was capable of , but more importantly a continuum to the present. So it is no good to say others are doing what you had proposed but they are current and up to date. Wrong. By asking the **journal Annals of Oncology ,Editor in Chief ,Prof. J.B. Vermorken** (see enclosed) to review my past work for plagiarism you will see 1. how advanced my theories were, and 2. how the research has continued to be advanced and its importance today. For example, the Global Climate Change controversy will have ramifications to all governments policies for the future, but ,rather than saying they are wrong, I will say they have misinterpreted the data and the effects they are seeing. So conclusions being formed are not necessarily the best. And instead of losing money , if you listen ,jobs will be generated.

**POINT : ANYONE WHO WOULD BLOCK CANCER AND AIDS THEORIES IS A FOOL ! THEY MAY BE RICH AND POWERFUL , BUT THEY ARE FOOLS !** The new research theories have already been considered by Noam Chomsky of Boston College, Kyoto winner, to be of “phenomenal importance to mankind.” **AND FOOLS WILL BLOCK THIS RESEARCH BECAUSE THEY ARE TOO STUPID TO UNDERSTAND.** President Obama , I hope you will try to understand .

Pointed Example : Is there anything more dramatic than watching the air planes crash into the Twin Towers ? Have you asked Disney or Hollywood to set rewind and take it back ? Silly , stupid question, no one can do that ! NO ONE ! The only choice humans have is to prevent disasters before they happen . BEFORE THEY HAPPEN !!! Once several new diseases emerge , air borne and water borne arise for which mankind has NO IMMUNITY IT WILL BE TOO LATE !!! And Disney and all of Hollywood won't be able to re-wind the film . My point is that too many people in the present world are delusional and have no concept of reality and believe life is like in the movies and everything can go on forever as it is now . Most people don't realize that the last 50 years of human , world , history is an exception and not the rule. But everyone believes that is how it is and how it will always be . There is no good reason for it to continue UNLESS we work hard and ensure it continues , and my research theories say we are running out of time and must act NOW. All the nations of the world must act together in a coordinated matter to save the human race , because that is what the stakes are . Now the world needs a new Roosevelt and Generals Marshal and Eisenhower more than ever. I have chosen these people as examples because they were able to coordinate great materials and peoples , but more importantly, especially, Eisenhower, able to get “personalities “ to work together. And that , Sir, is what , YOU, will have to do .The world, very divergent nations , China, Russia, the EU, the Saudi money, plus others are going to have to understand the grave danger facing mankind and over come very serious differences to work together to save

each others selfish interests, but more importantly, the world for the human race.

Time Insert : 11 August 2010 , New Superbug GENE could spread widely, so says the headlines describing the multi-drug-resistant bacteria ( with the NDM-1 gene) that people are bringing back from India and elective surgeries. Please look at my research proposals and how long I have said this. I am NOW talking about events worse than this , but please note the real time event. NDM means New Delhi mutant where the disease was first reported. The disease has targets of the LUNG and INTESTINAL TRACT : air and water borne media. Recall my comments on the emergence of new diseases . And this superbug moves from East to West, just like SARS a few years earlier. These are WARNINGS and the human race can't continue to disregard such warnings. So a later discussion will outline AIDS (turn of 20<sup>th</sup> century from apes ) and cancer , turn of the 20<sup>th</sup> century industrial pollution to 1919 Spanish Flu to SARS to this ( and a side discussion of the anomalies , Swine Flu going west to east with few mutations as if it was a released experiment :similar to radioactive hydrogen in subways during the 50s). Very serious discussions on the extinction of the human race.

Let me express what you are thinking right now, “Who the HELL DO YOU think you are ?” “And why should I listen to you?” Good question, and the answer is I'm the person whose work is so GOOD that Yale has plagiarized it and is receiving millions of dollars worth of grant funding for

it !!!!!!!!!!!!!!! So my research theories are so GOOD that Yale will PLAGIARIZE them and cause the United States Federal Government to enter into a CRIMINAL CONSPIRACY to cover the wrong doing up . That SIR, is who I am !!!!!

**PROVE IT !**

OK .

In the material I have sent ALL governments you will come across a letter from Dr.G. L. Nicolson (then ) of M. D. Anderson Cancer Centre and a very prominent and respected scientist. In the material circa 1986-88 you will see his reply regarding the Cell Death Signal Gene Theory , where I explain how there are genetic sequences which have been circumvented by cancer and if these could be corrected and the immune system could be restarted, then there would be NEW treatments for cancer . Dr. Nicolson replied that he could not comment on such a new theory but recognized its concept. Please note , DOCUMENTED evidence citing NEW THEORY!!!! Circa 1986-88 . Twenty two year ago !!! Now read the following :

From Medical News Today 23 Jan. 2009

By the time it is detected in many women , ovarian cancer has already spread to a point that makes treatment ,...,impossible,....., in a boost to their efforts to improve ovarian cancer detection and find a cure ,... Yale School of Medicine,....Gil Mor , M. D., and Alessandro Santin , M.D., have won over \$ 5 million in federal and foundation grants,.....Mor will use ,... to better understand the

**mechanism by which ovarian cancer resists CELL DEATH .....the idea is to develop new therapies that will target cell death pathways and reverse the resistance to chemo....This work will focus on how a tumour influences the IMMUNE SYSTEM to promote its own growth .....**

You may well say who cares , because irregardless that Yale and others have PLAGIARIZED your ideas and theories , we have the research now and people are doing the work? YES, NOW, but how many have died who didn't have to ? Doing the work NOW. Well you could have done the work over 20 years ago. Medicines and cures could have started say, circa 1992 or 1996. So , the US government's action to protect Yale and Waterloo has HARMED the American people, in more ways than one. Above , I said I sent my research proposals out so , either I would get help, or , not, then people would PLAGIARIZE the work and it would get done sooner :the concepts are therefore, PUBLIC DOMAIN. Any patents anyone may claim based on the Cell Death Signal Gene Theory , and restarting the IMMUNE system belong to the PUBLIC DOMAIN .And by approaching you now, President Obama , this will help lower health care costs because the medicines can be produced cheaper since the patents will be OPEN in the PUBLIC DOMAIN .And , was this one of the reasons that former President Clinton may have caused the people under him, Inspector General's Office, PHS,NIH and DOJ personnel to enter in to a Criminal Conspiracy, to cover up so people could get rich off of patents that they DID NOT work for? Did Bill Clinton instruct

people in the Federal US government to CHEAT in response to the pharmaceutical lobby and people getting rich off of exclusive patents. Did Bill Clinton receive monies from the pharmaceutical lobby ? This strongly supports the allegations of Criminal Conspiracy .However, another reason to approach President Obama now, is to benefit the American taxpayer. Precedent : **Mattel vs. Bratz**. The man who invented the Bratz dolls once worked for Mattel. Mattel sued , successfully, saying, irregardless of his leaving the company, the idea was a DIRECT offspring of work he did while at Mattel. Similarly, ANY FEDERAL funding Yale (or other) may receive for research, any medical product , or medicine that may be DERIVED from it is owned by the original FUNDER, the American taxpayer. So if Yale develops any Ovarian Cancer Cure , part of any profits must be seen as DIVIDENDS to the ORIGINAL investors : the American Taxpayers. BUT you argue that it will kill incentive to discover cures FASTER ! I will REMIND you, SIR, I was black listed and suppressed and the research was held back AT LEAST TWENTY YEARS. In direct contradiction to the claim of hurrying discoveries , it did the EXACT opposite! Had the federal government enforced the law as required the American taxpayer would have benefited greatly, and some may even be still alive ! These are GOOD reasons to approach you now, sir.

Again. Review your own comments concerning federal funding of embryonic stem cell research : to find cures faster ; well SIR, I have proven that the federal government funding agencies of PHS/NIH do exactly the opposite. The lawsuit may be very timely for an over view of federal regulations!

There is much more , and , for this reason I am asking that the **Annals of Oncology** be asked as an outside expert ( just like Dr. Nicolson from M. D. Anderson Cancer Centre originally was but was over turned by the criminals I've had to face) to review all the relevant material. Please don't lose your perspective : this is being done to establish my reputation that has been SLANDERED by malicious criminals so you will seriously consider the new research theories.

**HOW MANY WOMEN, AND PEOPLE IN GENERAL ,  
HAVE DIED FROM CANCER THAT DIDN'T HAVE TO  
BECAUSE THE FEDERAL GOVERNMENT ENTERED  
INTO A CRIMINAL CONSPIRACY? THAT IS NOT  
SUPPOSED TO BE THE JOB OF THE FEDERAL  
GOVERNMENT, ITS SUPPOSED TO EXPOSE FRAUD  
AND PROTECT THE PUBLIC !  
YOUR ANSWER , PRESIDENT OBAMA .**

Which leads us to Dr. Anthony Fauci and his new ideas and new people . Funny he never answered anything I have ever sent him . Maybe you should ask him why? Also ask him to answer the pertinent questions ( is research described as Feces excellent ?Y/N ? ,.....) Long story short, Dr. Fauci since he has been in charge has FAILED to cure AIDS. How long has he been in charge ? Over 20 years : point of fact he has FAILED.

PERSPECTIVE : President Obama the movie, “12 O'clock

High” is used as a tool by industry to show leadership and other values that are needed to get the job done. If this was WW II Dr. Fauci would have been replaced a long time ago because he couldn't get the job done. Fact, all he has done is provide funding for friends and ensure he has a comfortable job . This is a fact .President Obama you are going to have to start selecting people who can get the job done because the survival of the human race depends on it . You can no longer afford bureaucrats : if this was a pro football/basketball team what would you do ? When do you replace the coaching staff for people who succeed? And this is why you must review what J. C. M. Riley really represents . He represents a research program that rewards nepotism and incompetence as long as it has political connections; results and breakthroughs are secondary. **[ Chris Hedges has a new book regarding society and says it is failing to reward innovators but promotes students and academics for rote ; not the ability to think and create]** The world can not afford this kind of luxury if mankind is to survive. And Dr. Fauci is part of the problem, twenty years ago he was asked about fraud in research and his answer was that 99.999 % of researchers were honest and ethical. This is on the record; and also on the record is the number of scientists who have been proven fraudulent. So Dr. Fauci has a big disconnect from reality. Ask, your Secretary of State, Hilary Rodham-Clinton, remember when she was campaigning to bring the Korean who cloned a dog to America because America needed new research. And he was proven to be a FRAUD ! But her husband wouldn't help me who had support from a prominent researcher at M. D. Anderson Cancer

Centre .But they supported Riley , and 22 years later Yale is citing how important Cell Death Signal Gene Theory is to research !!!!!

Advanced research was black listed and suppressed to cover up fraud. And Dr. Fauci is on public record on needing new ideas . And he refused to respond to my emails . Why? Excuses aren't acceptable. Allegation, he doesn't want new ideas for answers to AIDS , just ideas to maintain the status quo and continue research funding to friends. That is not new .In six months I proved all the research at the University of Waterloo was wrong. Fact. Now Dr. Fauci is afraid IF I get help I might threaten his reputation and money he has promised his friends. Is that fair to the American taxpayers and people who donate money to save lives ? Is it ?

American Icon Precedent Cited. I will ask you to send your forces to MIDWAY, Fauci and others will tell you to go to the Aleutians. Think about it,Sir :The new research theories are much like Rochefort and the freshwater processor. I am asking your help to do the necessary work ( new research ) to prove it. President Obama Cell Death Signal Gene Theory proves that “AF” was Midway, now, Sir, The Viroid Thermodynamic Theory on the Origin of Life (VTT) can win the battle. Noam Chomsky, of Boston College, Kyoto winner said it may be of phenomenal importance to mankind. Do you launch the airstrike or wait for the Aleutians/Dr. Fauci ? What would Admiral Chester Nimitz do ? Would he review the documents and say,”these people have lied and produced work equal to feces , while this guy has told the

truth . Intel based on the truth is what we move on.” I believe that is what your choice boils down to .

**What Does VTT Mean and What are the Consequences.**

The condensed version. Dr. Conrat-Frankel won the Nobel prize in 1963 stating viruses are the origin of life. I presented VTT circa 1992 at the University of Guelph , and basically it states that viroids, smaller bps (base pairs ) of viral sections formed the genomes of all living things as a method of **STORING ENERGY**. Life exists simply to store energy; and everything, **EVERYTHING**, is just a consequence of energy storage . From all life forms to intelligence. Intelligence is **JUST** a by product of life forms becoming more complex. Intelligence is **NOT** necessary for life to continue, so the human race's opinion of itself and intelligence (being the penultimate of evolution) is greatly over rated. In fact , in the greater scheme of things, Intelligence may be on par with **Creationism** ; Evolution is a living chemical reaction : in short : a mathematical construct following a domino path to store energy. Chaos theory is **CENTRAL** to its existence but to explain the detail is outside of the scope of this letter : future research will explain it. All that you have to appreciate is that **BIG** numbers are the only things of consequence in Evolution's greater scheme of things.

Do you think that you understand evolution, well you do and you don't. You see bones on display and trees with branches but you don't really see what evolution is . Forget the bones, just look at the **Base Pairs** and forget everything else. What was the simplest living thing ? A single cell

creature. What is the most complex ? A multi-cellular eukaryote. And there is a continuous linkage from that one cell with a limited genome to the huge genome in ,say a human. Essentially, in FACT, life has gone from a very limited short chain of bps to miles of complex interwoven DNA ; how it got there is irrelevant noise, what you have to see is the direct linkage. The CHAIN grew by various forms of ADDITION just like a chain is linked to get longer and longer. Life is a very special form of continuous chemical reaction storing energy. It expresses itself in many physical forms that we see as animals and plants etc. ALL of which represents the chemical reaction pathway. A Living Chemical Pathway is Critically Important Concept to Remember.

Sex to evolution is not as important as some consider : it is a mechanism . Even longer story short, Evolution is controlled and directed by DISEASE. Disease is Evolution's messenger and controller. Sex may be a special derived condition of disease ( sperm DNA entering ova is the same concept as viral DNA part entering a cell ). Conservation and interchange of mechanisms is very important to Evolution. Cancer and AIDS are special conditions that under healthy conditions SHOULD NOT BE SEEN. That we are seeing these diseases in such numbers is not good for the human race. They are warnings that a MAJOR evolutionary event may be about to occur : THE EXTINCTION OF THE HUMAN RACE.

Did the 1919 Spanish Flu pandemic develop in 1919 ,or 4 to 5 years earlier? Did you ever think about that? Or do you believe that illnesses just spring up by magic out of no

where? Most people don't think it through .And there were reasons for its occurrence and development. Like Bubonic Plague, and cancer and AIDS. Not magic, but scientific mechanisms operating to cause the occurrence : all Regulated by the Living Chemical Reaction called Life. The important operating principle that you must focus on is ,”REGULATED .” And ALL diseases are GENE SEQUENCE SPECIFIC ,diseases are specific for species because of the expression of specific gene sequences. Logical and simple but most people over look it. This may be an overly general statement but it is the beginning of understanding.

I direct everyone to see the BBC documentaries, “The Planet of the Apes “, and “The Big Stink.” The first explains how Earth once had hundreds of primate species but they went extinct and there are only a few species existing today. The second explains how the London sewer systems were conceived and built and how it prevented disease and helped prove the disease theory (mid 1800s). Both are important to understand where mankind is today and how disaster is facing us.

#### **FAILURE OF INTELLEGENCE :**

The brilliant scientist Stephen Hawking says in CENTURIES ahead that it will be hard for mankind to avoid a disaster of biblical proportion on Earth and man should leave for the stars “if” man can stave off disaster for 200 years or so . Well, Sir, you don't have 200 years, you have fifty or less . And when was the last time an American, or any Earthling, set foot on the Moon. About forty years ago, and given this incredible growth rate in space travel man is going to get to a new Earth in less than fifty years ? I don't

think so. The problem with physicists is they study systems , stars etc , which are billion, and trillions of years old. They LACK the concept of reality ! The immediacy of life and how death can occur in seconds. Biological living systems differ from the living energy systems of stars in their time relevance ; for example, the American Thomas Jefferson thought it would take 500 years for America to inhabit the West : fact, it took less than 50 years. Living systems are incredibly fast ; especially new diseases , they spread , like wild fire ( or like small pox among American Indians) . So, Sir, given the private sector's efforts of developing space travel over the last forty years I can categorically state that the space escape theorem isn't even an option for mankind's survival. We have to repair Space Station Earth here and now ( just like the astronauts had to repair the orbiting space station themselves). So you have to start thinking about the concept of the Great War to save the Human Race and the Planet Earth with all the governments and private sector working TOGETHER now: nothing less !

### **BUT WHY FIFTY YEARS ?**

Fifty years is not as arbitrary as it first sounds, it is based on the optimum healthy reproductive age of the human reproductive cycle : 25 years old is about the age where most humans are at their peak of health , strength and stamina etc ; therefore , the best age to be parents, and 50 years are parents to grandparents . Two generations. And two generations would give the optimum conditions for the new emerging diseases to be totally TARGETED on the human race. Totally targeted without any of the fail-safe

mechanisms as found in Black Death or AIDS .

And as stated many times, according to VTT , disease controls the rate of evolution, with the extinction of species and the promotion of others. Unfit species cause the generation of diseases which specifically target themselves : hence , a species that is UNFIT for the environment proves ITSELF to be unfit and is eliminated by mechanisms quietly operating in the back ground ( which is why it is so scary that we see cancers and AIDS ). And man is generating the cause of his own extinction : I hope you listen to me in order to prevent this extinction and the “RESETTING/REBOOTING” of the living system .

## **THE WHY STATEMENT**

Why Explain the Theory ,and Why the President of the United States Must Listen .

Vic Zilmer,an engineer overseeing the Army Engineer Corps rebuilding the levies in New Orleans said ,” the Katrina disaster was the combination of the Power of Nature, and the INCOMPETENCE OF MAN ! President Obama , these are the EXACT conditions which will lead to the EXTINCTION of the human race unless we SERIOUSLY (unlike the FIRST new Orleans levies) act now !

Historical Model : Mid 1800s the mayor of Paris was warned of cholera in the drinking water and presented with a clear glass of water as a sample . He had the average education of the day, and declaring it clean drank it only to die a short while later. He couldn't understand the New Germ Theory, and I'm afraid most people will be no better able to grasp VTT and the huge concept of the entire human race going

extinct. Mind boggling.

### Precedent : Greenhalgh Theories vs. Yale Plagiarism

The argument has already been made regarding J . C. M. Riley (Waterloo) and H. R. Behrman (Yale) plagiarizing the suppressed E. A. Greenhalgh research and theories , and why political influence ( criminal conspiracy ) was used to quash any investigation. However, the real harm to the public due the suppression needs further demonstration. Fact : reported 18 August 2010 , a team from Yale reports a Chinese herb mixture helped protect patients with cancer , their intestine lining helping them to recover : reducing inflammation while boosting the effectiveness of the chemotherapy to kill tumours.

Long story short : as outlined earlier I turned down chemo/radiation to apply herbal treatment and survived my cancer better than the American bicyclist , Lance Armstrong. I had sent out many research proposals suggesting the use of herbs etc so the theories could become public domain and help society . BUT MORE IMPORTANTLY ,subsequently you can see reports from many cancer researchers , including Yale , who just a few years earlier were WARNING the public NOT to use herbs with chemo as it may harm them and interfere with their recovery. Why the change ?

BIG POINT : most big money research centres ( like Yale ) have been overwhelmed by the results from smaller centres around the world who are reporting herbal results and are johnny come lately jumping on the funding bandwagon .

MAIN POINT : Yale and Waterloo's suppression of

Greenhalgh in their Criminal Conspiracy has harmed the American taxpayer/public . Case proven .THEY WERE 20 PLUS YEARS WRONG ! AND THEY WERE WILLING TO ACCEPT LIES AND FRAUD AND LET PEOPLE DIE OF CANCER JUST SO THEY WOULD CONTINUE RECEIVING FEDERAL FUNDING . THAT IS BAD ! AND CRIMINAL .

Time Insert :

Viriod Thermodynamic Theory and Cell Death Signal Gene Theory and Embryogenesis AND findings of 2010 Perforin /"Death Protein", ; How Cancer Hides to Survive Chemo(interleukin-6); and "Cold Virus Clue Found" by research groups reporting Fall 2010

Long story short VTT grew out of Cell Death Gene , both developing from observations in Reproductive Endocrinology and Embryogenesis and the various stages of fetal development. A baby grows through various tissue stages with tissue being developed and absorbed (told to stop- die: controlled death).I am not taking away from the new research groups reporting now, and they can have the opportunity to answer the questions of : 1. is research described as feces ,excellent ? Y/N ? Is lying for money fraud? Y/N ? Price of admission , so to speak. So Australian and British scientists reporting (1 Nov. 2010) a "death " protein which destroys rogue cells , and consider it a cancer break through, must also consider , is this the same mechanism which causes tissue changes seen as the fetus develops. They are discovering a pre-existing mechanism that I was already working on over 20 years ago. And when Researcher , Joe Trapani said that perforin's structure was

similar to bacterial toxins , suggesting that the human body had learned its tactics from diseases themselves; isn't he just **confirming and validating** my theories ?He goes on to say the mechanism is conserved all the way back to bacteria. AND, researcher, Michael Hemann (MIT) explains how tumour cells hijack protective proteins to stay alive , is actually on the path to the explanation of how VIRUSES become incorporated as GENES creating the GENOME as VTT postulates. And similarly the British researchers (James et al in PNAC) talks about a disposal system inside the cell and protein TRIM21 and a natural defence system : again , related to incorporating genes into a genome. IS anything I stated here a COMPLETE explanation? No. Just a demonstration of where the research I propose is going and its significance . Don't forget , all my past research talked about interfering with the formation of viral components and proteins to combat cancer, and how it relates to the viruses associated with AIDS mechanisms. Black listing has hurt.

**Complicated discussions over simplified but necessary for the public debate meant to follow.**

The doctors at Yale, and other facilities , who continued receiving monies while Greenhalgh was blacklisted must be compared to the doctors that ridiculed and suppressed Semmelweis . Dr. Semmelweis was an early proponent of the new germ theory and told his students to wash their hands between operations so not to spread germs and save lives. Unfortunately, his critics cared less for saving lives as they

did for their personal prestige and power. And the point of the Mayor of Paris drinking a glass of cholera even when warned by a doctor who practised the new germ theory , so you can appreciate my research was 20 years advanced and solid so to seriously consider the warnings of VTT and the Extinction of the Human race. Please consider this is NOT new if you examine how long I have had the website and other proposals being sent out. Now note the 2 Sept . 2010 article by Jeremy Hsu of LiveScience who wrote : “Mass Extinction threat : Earth on Verge of Huge Reset Button?” Compare that to everything I've gone through with Yale et al ; I tend to be ahead of the curve sir, mainly because I tell the truth , while my detractors bend the truth to suit funding requirements. Think hard about that, sir! And I am not talking about many different groups of species, I am stating the HUMAN RACE will go extinct unless we start acting now .

President Obama, you just (5<sup>th</sup> anniversary of Katrina ) reassured New Orleans that your Administration will NOT repeat past mistakes so a disaster like Katrina will never happen again. President Obama, Katrina must be seen as a metaphor for an even GREATER disaster facing mankind; one which the world is completely unprepared for : emerging diseases for which mankind has no immunity! And we must act effectively now , so will you listen, or will you be another President Geo. Bush and run business as usual : Mission Accomplished ?

President Obama being blacklisted and suppressed means you can't do the research nor go to conferences to present work , so there is nothing malicious, mischievous ,

nor frivolous in approaching you now so the important theories get the public attention they deserve. My situation at the University of Waterloo was totally unacceptable ; either I chose to lie and accept the fraud or I would never be allowed to do any research. In fact one law firm informed me point blank that the powers that be have said that I would never work again in my life . I have no choice but to approach you thus, but another example will make it even clearer. Too many Afro-Americans forget how many whites were in the equal rights movement fighting to create a better , fairer society for all, so Sir, if you support the stand that I should have lied in order to continue the work isn't that going against FDR and the Tuskegee Airmen ? And further , what good is ANY research based on lies ? What is your answer ?

Man is Generating the Cause of his Own Extinction.  
Evolution : Resetting /Rebooting the Living Chemical System.

What does VTT ( the Life continuum to store energy ) mean to EXTINCTION ? Why Diversity ? A Fail-safe to Restart the Chemical Chain Reaction .

Big Point : Deepak Chopra plus NASA astrophysicists and others report DNA particles in space dust through out the universe .DNA molecules are everywhere and common. Yet , DNA are special particles with a very special PREDETERMINATION (why?) TO ACTIVATE a Chaotic /Mandelbrot type REPETITION sequence chemical reaction growing the DNA chain longer to all the various life forms/expressions we recognize as life. A very unique

**SEQUENCE Generator : a very simple but powerful concept !**

**DNA is the SEQUENCE GENERATOR in a LIVING Chemical Reaction which the concept of Chaos mathematics explains how longer chains and complex organic molecules ( called animals and plants ) develop in order to STORE ENERGY . The whole point of Life and ALL living things is SIMPLY to STORE ENERGY . Life developed more complex lifeforms in order to store more energy . That is all . Everything else is a spin off of the chemical reaction and energy storage : that is the ENTIRE point of DNA and Life -energy storage . Even the evolution of civilization is a spin off and SUBSERVIENT TO THIS TOTAL COMPLETE UNDERLYING PRINCIPLE !**

**All life on Earth began with the “SEED” event of DNA initiating ( point of beginning -chemical reaction starting point) the growth of R/DNA chains storing energy in the form of chemical energy ( molecules, bonds etc ). There are probably MULTIPLE starting points all over the Earth when the planet's environment was capable of supporting the INITIAL (CHEMICAL REACTION) EVENT. The proof is that the event occurred and life exists : the living ongoing continuous chemical reaction called life . A living continuous chemical reaction MUST have mechanisms ( from the beginning ) in place so that IT WILL NOT ( NEVER) run to completion. This special reaction protects itself with FAIL SAFE mechanisms preventing the Termination of the Living Chemical Reaction (the reaction will never stop as long as energy is continuously put in ) . As long as an energy source ( the Sun ) exists and there is a suitable and HEALTHY**

Reaction Vessel ( Earth ) exists then the Living Reaction Persists . However, like ALL chemical reactions , it can be TERMINATED ! Life doesn't “want” (predisposed to continue) to Terminate (die ) , but termination (death ) can occur if events are allowed to occur . **Chemical reactions are terminated/stopped by METABOLIC INHIBITORS/POISONS :**

industrial waste products , pesticides, sour gas flares of oil wells, chemical dispersants like BP Gulf clean up (rain from the Gulf said to reach Arkansas and the Dakotas), cyanide, heavy metals from mining , industrial plastics (BPA widespread in ocean water and sand ) etc., etc.

Plus other products from man's industrial processes and munitions . And mutagens and radioactive agents (smoke in Russia forest fires carrying Chernobyl radiation to the world) which cause birth defects etc . World wide distribution of BAD material that NEVER has happened before in all of the Earth's history!!

Point : man is releasing these materials into the environment in STATISTICAL quantities beyond any levels EVER in prehistoric history, or EVER . Beyond the capacity for the planet to absorb and METABOLIZE / deal with them . One trigger of the REBOOT/RESET mechanism .

## **FIRST MISINTERPRETATION OF SCIENTISTS ON GLOBAL CLIMATE CHANGE /WARMING**

Fact : Global Warming is occurring , as it has many times in the past through various ages of evolution of the planet. Many factors are contributing to this, including man's

activity. However, world flooding etc. is not the greatest danger facing mankind ; and this must be understood in order to prevent the human race's extinction . Dr. James Lovelock of the GAIA theory and adviser to NASA ( and who has also reviewed my research theories ) has stated “that the Earth has a temperature .” The polar caps are melting and the oceans water levels are rising; worldwide recognized fact. The most obvious effect that scientists are overlooking is that the planet is trying to dilute the water concentrations of the oceans .The oceans waters are no different than the blood plasma of any living organism and for life to exist the plasma of living organisms have preset concentrations of necessary electrolytes , pH. , etc to support life .If a living organism (man etc) becomes slightly poisoned his blood chemistry alters to dilute the poison to lessen its effect so it can be metabolized out of the system. The Earth is attempting to dilute the oceans to lessen the impact of man's pollutions on its “blood chemistry -concentrations” so life can function in it . To keep the planet Earth alive. More and more water is being added to the oceans to dilute the poisons. Ask Dr. Lovelock to explain the GAIA -Living Planet – Theory to you since it is his work . So long story short, yes the Planet is warming up and ice is melting and CO<sub>2</sub> levels are rising but all by themselves these events are NOT the final agent of mankind's extinction. People will die and suffer but the human race will not necessarily go extinct just because of starvation, droughts, and other side effects of Climate Change. These events have happened over and over again and again in Earth's history and the planet and life were able to ADAPT . What

you must examine NOW is the Earth's diminishing ability to adapt and absorb the CO<sub>2</sub> : you will be shocked !

April 2010 , AP : New Study says ocean's chemistry changing rapidly,

May 2008 , AP : Ocean dead zones growing study says ,

March 2010, AP : What if all coral reefs die? Experts are scared ,

July 2010 CBC : Phytoplankton vanishing from warming oceans, {the oceans are the planet's lung !!! and food supply}

July 2010, AP : Hundreds of dead penguins dot Brazil's beaches,

October 2010 , sharks, and rays are disappearing from oceans,

plus many more but the point is emphasized ! All life came from the ocean : ALL LIFE and ALL LIFE **DEPENDS ON THE OCEAN'S HEALTH !!! And the ocean's health depends on the plankton .**

VERY IMPORTANT POINT : THE GREAT BARRIER REEF IS DYING , SCIENTISTS GIVE IT DECADES TO LIVE ! There are several articles on this but the point I wish to make is that the Great Barrier Reef (any coral reef ) is a LIVING organism made up of billions of living organisms and cells , a direct analogy to a body , a human being , and it is being killed by climate warming AND declining water QUALITY from coastal runoff (agricultural CHEMICALS ). The Reef could die in decades . A huge organism (bigger than many countries) could die from the change in water quality : GO EXTINCT !!! IN JUST

**DECADES .If this INCREDIBLY HUGE population of INTERDEPENDENT organisms can go extinct, then so can mankind ! This fact must come to the forefront of every THINKING human's mind.**

**\*\*\* Just maybe, now, you will appreciate why Noam Chomsky (Boston College etc, etc ) said my theories could be of phenomenal importance to mankind ! \*\*\***

**Important Point, one of the people who is guilty of Criminal Conspiracy to commit US federal fraud and blacklist me and my theories is Dr. Douglas Wright, former Chancellor and President of the University of Waterloo, and it is very appropriate to emphasize his public stand on handling pollution and garbage ,“incineration.” This genius has suppressed my research and human rights for over 20 years ( a death sentence really except I refuse to die ), and , so , has forced me to approach you this way. More pointedly, though, is Wright's connections to corrupt politicians like Brian Mulroney and other policy makers, especially in regards to the oil sands. As you know from the deregulation of the Gulf Coast oil industry that disasters occur, more likely than not due bad practices. These practices aren't necessary but squeeze as much money as possible by bypassing environmentally proper techniques. The Canadian Oil Sands are much the same : very very harmful ,and politicians who are in the industry's pocket refuse to correct the problems even though the technology exists; it just lowers profits. And the Canadian government's role in the Criminal Conspiracy with Wright is that they don't want to have to deal with honest scientists who tell the**

truth, hence they black list people like me. As of 7 September the CP reports, Study says birds dying in oil sands at larger rates : 30Xs the rate suggested by industry and government. I believe the public will see the issues as so important to understand that this was the only way available to me , and I had no criminal malice, nor mischief , nor frivolity intent . That is why this material will be made public domain on the internet.

To understand the Evolution of Life you must re-examine the Evolutionary Tree with all its spreading branches , only ignore the phenotypes ( physical structures) and only follow the genomes ( growing chain of bps ). Although there are many branches they all link back as chains to the original “Seed Event” (i.e., like all the branching wires in a large building all go back to one fuse panel point ). Another analogy is how the original PC had an “86” operating system which evolved to a 286 to a 386 to a 486 to a Pentium to a Pentium 5 to a etc. But all software is backward compatible to the original first no matter how much software engineers have made the programs elaborate and complex. The concept of CHAOS mathematics/Mandelbrot patterns show that although everything is wrapped in greater complexity and complications a REPEATING REACTION EVENT occurs over and over again as organisms evolve to different species in changing environments. A repeating Chemical Reaction , albeit growing in molecular complexity ( animals and plants).

Most Simple : Life is a CONTINUOUS Chain growing event , no matter the complexity being “Piled On “ , obscuring the

obvious, the Original Generating Reaction . And in order to protect this Chain Reaction , Life has built in a Reset/Reboot Reaction , Extinction, then Restarts the system ( just like your computer crashing but with chemicals). Species go extinct , BUT Genome Constructs do not (stop) unless ALL Life terminates .

So giant dinosaurs disappear after the asteroid, but birds reappear to continue the chain, but they are slightly different. So even though the Reaction/System restarted the species are slightly different because the Reaction Vessel ( Earth) is also different . What has remained the same is the underlying Continuous Chemical Reaction. A very long story to get to this point, if you have further questions, ask me in person.

Briefly, all life forms from fish to amphibians to reptiles to mammals have a “Prototypical” Genome Construct platform from which everything develops off of. Not unlike the idea that a simple wagon has four wheels from which all transportation vehicles have developed no matter how complex. And in the even of designing from scratch the engineers always start with this most basic design/concept first ( even if it's only hidden in their subconscious thinking ). Therefore, in the event of any disaster requiring the Reset/Reboot of evolution the Living Chemical Reaction returns to the most basic available prototype and continues on from there. More detail which explains the ever changing competition between groups like amphibians and dinosaurs/birds and mammals, but has to do with the simplicity of the smaller group living in the shadow of the larger group before the disaster, and is better able to

develop faster. So you can have many extinction events (like asteroids) with dominance being exchanged over and over.

Present day, man is POISONING Earth. These poisons threaten to Terminate the Continuous Living Chemical Reaction by simple chemical principles of chemical completion of the reaction : basic  $A + B = C$  run to completion chemical reaction. Metabolic inhibitor chemical stops the over all “polymer” chain reaction. Very simple stuff. All the industrial wastes and pesticides have been briefly outlined above. And we are filling our lakes, and rivers and oceans with this stuff as NEVER has been done before in all of Earth's history. So , YES, Global Warming/Climate Change is occurring and warming the planet due to man's activity and natural events , but it is not the greatest danger to man kind's EXTINCTION : the Reboot/Reset mechanism is .

## HOW DOES REBOOT/RESET MECHANISM WORK ?

To understand this , you must understand my present theory ( and why I validated/vindicated my past research) ,The Viroid Thermodynamic Theory on the Origin of Life (VTT). VTT states that diseases ,viruses and bacteria ,control the RATE of change in evolution. The Rate; fast or slow. And UNFIT species go extinct because they do not “fit” in their environment. They damage the environment so it can't support them. What is starvation ? Yes, but that is an obvious mechanism not necessarily tied to evolutionary change, more a localized change. T Rex can starve to death in one area but that does not prompt its change into a bird. Yes there are several evolutionary events but I am focusing on

this important one. If you note, I was able to tell the University of Waterloo in just 6 months that a full professor was BUBBLING air(oxidizing) into his experiment totally unconscious , oblivious of the effect, and reporting erroneous results. That is on record, so I don't want to split hairs here with details, I will do the research in the future , but you forget I AM BLACK LISTED and so had to approach you now this way. However, I am still establishing my credentials and will not accept nit picking arguments , the issues are too big for pettiness. Anyone wants to argue , then answer the Q : is research described as feces, excellent, Y/N? T Rex can still exist on another part of the same continent. Too long to completely explain here (talk to me). There are several mechanisms acting, but I want to concentrate on the major one.

Disease as the regulating agent.

Fact , bacteria and viruses are always exchanging genetic components of their genomes , so changing their respective actions somewhat. They also exchange genes with material in feces so becoming adaptable to the species generating the feces. Present day fact : man is replacing more and more species as we destroy their habitat , and man has made the oceans open sewers where the majority of the feces is human. The majority of genetic material for viruses and bacteria to focus on is HUMAN GENES!!! So it becomes a game of BIG numbers as I told you at the start of this dissertation. Man has become the number one UNFIT species and is threatening the survival of all life on Earth and his actions are about to TERMINATE the living Chemical Reaction called L:IFE. So Nature/Earth has in place the

Reset/Reboot mechanism : disease to target the unfit species. So mankind is TAGGING themselves for Termination/DEATH to save all life on Earth. Several new diseases , air and water borne will emerge with out fail-safe mechanisms and man kind will be exterminated to the last individual in less than than a generation or two. Maybe in a few years, and I've explained we may have only 50 years to stop it. Cheerful thought, would you like to prevent it?

Oh, what have I left out ? The oceans are not up taking CO2 because the plankton are being destroyed, and subsequent species along the food chain are dying off ( remember penguins ). All the mutagens generating cancers , and all cancers are viruses because viruses formed the genomes and come out under proper stimuli to reform viruses etc etc. Which is a basis to cure cancer , but also a warning because this is the basis for genome growth and species generation and shouldn't be observed unless something is wrong. Which are mutagens , as mentioned before. These mutagens allow viruses etc the opportunity to cross over to species not originally the target. Example, when did the 1919 Spanish flu pandemic start ( no this isn't when is Washington's birthday type question, but just as tricky), 1919 or a few years earlier? Essentially it started several years earlier when birds intermingled with human feces and munitions mutagens associated with war , and voila , killer disease. Simplistic as all get out, but don't forget I'm BLACK LISTED ! Help me prove this and other to save mankind from a disaster.

And AIDS/HIV is more or less proven to have crossed

over from apes due man's encroachment on territory in the late 19<sup>th</sup> century, and has taken this long to incubate (wonder drugs allowed people to live who would have died off slowing its spread). And don't forget, 1/3<sup>rd</sup> are immune carriers as explained on my website. We are seeing a genome lengthening event and new subspecies (of humans), again theory with my explanation.

It was reported 17th September 2010 that HIV in monkeys is much older than first thought. The U of Arizona said the slow evolution from killer virus to a harmless form took a long time and has questions for HIV in humans lethality and wonders why something that was harmless became dangerous at the turn of the 20<sup>th</sup> century. U of Arizona said we don't know what the "flashpoint" was but there had to be one. And a good basis of my VIT research, Sir. But there is more because we are talking about bp viriod/viruses being related and incorporated into genome type events. Scientists have reported mutant gene variants in the Tasmania Devil cancers and report this may give clues to finding cures for cancer. And Scientists ID 5 gene variants LINKED to ovarian cancers. Big Point : why are people getting more cancers in the industrial age than before the turn of the 20<sup>th</sup> century? Are mutagens causing the gene variant mutants in women or are mutagens activating the cancers? Or both? Essentially viruses give up their FULL identity (complete length) to incorporate segments of themselves to become genes in a genome : overly simplified. Then some signal, from hormone, hormone mimic, mutagen etc causes the "gene variant" mutant or improperly incorporated region, to re-emerge to form a

virus which causes the cancer related events. And the biggest clue in this concept is the EFFECT by RADIATION : normally healthy tissue without mutations become cancerous. The hypothesis becomes that the radiation causes a break at a point where the genome was supporting the viral component in a stasis condition but this is changed and the virus factor can reform. Simplistic ? Yes, but the implication to curing cancer and other health problems is tremendous and should warrant help, NOT blacklisting and suppression. Growth of the organism, healthy growth is also a controlled viral incorporated event but it is time and synchronized properly. See the importance of viruses as the progenitors of life .? Very long story short : these events are genome growing encoded events.

Murine (mouse ) cancer has recently been associated with Chronic Fatigue Syndrome , and another inter-species exchange taking place. The genome interchange mechanism Etc Etc Etc , you really can't handle everything that I HAVE to say and prove. What I am striving for is a comprehension., "Ah, it is a possible idea ."

Basic : Viruses and bacteria exchange genes so to target more species , especially species which grow out of control of other mechanisms (starvation, predation etc ) that control them. They exchange genes in feces , especially when it becomes abnormally concentrated in the environment (remember see the "Big Stink" development of London's sewers ,and the world's) ( and regular disease control no longer affects that species : i.e., miracle drugs ). And more exchange occurs when man puts his genome in GMOs This

is a very special case which may speed up the emergence of new diseases because what is postulated (hypothesized) with cancer and AIDS is that there are special genome MARKERS that limit this type of event so species targeting by disease is limited. A FAIL-SAFE . However, we are circumventing the safe guard (again) and are endangering ourselves. This may have already happened , or about to happen. A scary potential.

Everything is so incomplete but that is why my original thesis must be reviewed by the outside journal to prove what I can do against incompetent and criminal universities, and impossible odds so you will appreciate what I am telling you. Are you starting to see the harm NIH has caused by supporting a lie to cover up a federal felony ?

In Short : New diseases are emerging because humans have become statistically an abnormal population outside of their naturally prescribed environment domain/set. Domain/Set is that given natural conditions and effects (starvation. disease, predation,exposure ) limiting population growth to reproduction and natural cause deaths is how big a population may grow and is LIMITED by Nature/Environmental Conditions. So any population can only attain a certain size and Nature and the Environment has preset limits . Man has stepped outside of the Natural Limiters. This is man's special ability that man has over all other animals, the ability to change and shape his own environment. Unfortunately, unless man uses his special ability to save the environment, then the Fail-Safes that Nature has built in for out of control species will kick in and

eliminate man.

In short, man's contamination of his own environment is triggering a Fail-Safe mechanism that operates unseen in the background when other Limiters fail to function. This mechanism saves all other Life on the planet while eliminating the UNFIT offending species. This will be the occurrence of SEVERAL (not one nor two ) air and water borne new diseases for which mankind has NO IMMUNITY.

There is the “Butterfly Effect” to explain but the mathematical model is much faster than the reality one because mathematics are pure and real life has so much flex built into it so that Lag Time and Saturation Effects/Buffering must be explained. BUT , then you have Exponential Growth to deal with, which is not good. So you really have a limited time to act.

Do you want to stop it ?

Where Will the Money Come From ? See the material titled “Planetary HOA Fees.” Outlined is how to do the necessary while creating jobs and prosperity for everyone , sounds like a win win situation . Will it be easy ? Was it easy for Eisenhower and Marshal to get all the differing personalities to work together ? No, but they were the men needed for the big job of their day. This is the BIG job of our day, and hopefully, you are the man for the job !

Essentially, what everyone must come to see is that mankind has no choice. There are just two choices : correct the situation, or DIE ! You can't put this off or even consider mankind living through another “Dark Ages” , even if some

foolish people believe governments can build survival bunkers for the Elite to hide out in. The diseases will just be too pervasive for any filters (air and WATER ,on such large scales to support a human population and necessary food animals , crops etc )to work to stop them all. No Dr. Strangelove escape for anyone. The sooner everyone realizes this fact the sooner man kind is saved from himself .

This is crazy ! No, Sir, we forget the wonder of miracle drugs (which don't work anymore ) , and how far mankind is removed from The Black Death Plagues : don't forget 1/3<sup>rd</sup> of Europe died (many many many ) in a very short period of time . And the ONLY reason anyone survived is because the disease had a natural FAIL-SAFE built into it. Think what would have happened if 1/3<sup>rd</sup> of mankind wasn't NATURALLY immune to that disease. And don't forget our success rates with the flu vaccines (NOT) and how quickly (very slow) they are developed. Now think about the same scenario but there is NO fail-safe and there are several very deadly diseases. That is what we are creating and must stop.

Xxxxxxxxxxxxxxxxxx

Elite rich people are appointing elite rich people/ cronies to committees on Renewable Resources, Sustainable Growth and Green Committees etc etc etc but these are CLOSED little groups or old loops of friends trying to be “gatekeepers” to maintain their private status quo. They are citing change as long as that change will NOT affect them or their friends. All of the Elite keep thinking old thoughts that it is to lower taxes on themselves while reducing real jobs

and real wages but they don't have to invest in society themselves. These faux think tank groups etc etc are not about the necessary changes everyone will have to make, but rather cosmetic facades to paint over the necessary changes that must follow. New technology will eliminate much of the old, just like the railroad concessions given to Vanderbilt at the turn of the century were eliminated. The railroad barons did poorly, but the rest of society changed for the better. So as long as you have special interests limiting necessary new ideas, all you will end up with is ways for these people to hang on to their personal wealth and status while they ignore the actual issues and real problems that MUST be addressed ( just like the Elite bourgeois of French nobility ignored the poor until the poor lopped off their heads). Which is why my new theories MUST be made PUBLIC DOMAIN . Open debate and full discussion with complete transparency and accountability. Specific Example : Jim Balsillie , a protege of Dr. Douglas Wright ,of the University of Waterloo , both were fined by the OSC for unethical actions dating back to 1996; however, and more importantly is Wright's stand on the environment. Wright is on public record as stating that the solution to the garbage problem is incineration. Hardly good for Global Warming. Further is Wright's connection to politicians and their cover up of the pollution of the Canadian Oil Sands. Again not a good stand. And the evidence proves that Wright is a liar who influenced government to block research of value to the taxpayer in order to experience personal gain. So why shouldn't Balsillie continue what he has been taught, after all , if this man will claim he has no

knowledge of the Federal police coming to the Waterloo university campus to investigate fraud, just how aware is he of any matters. But worse, and more likely, is his willingness to over look criminal acts in the name of profitability. So why is it appropriate for Mr. Balsillie to be appointed to the UN Committee on Global Sustainability ? Maybe everyone on the committee is a sham and the public should question all the members. For these reasons it is important that this letter is made public domain on the internet so the public may voice their opinions on matters affecting their lives and livelihoods. And a very valid reason for approaching the President of the United States in this manner.

#####

Proven fact : Dr. Douglas Wright, former Chancellor and President of the University of Waterloo is a proven liar who entered into a deliberate felony fraud for U.S. Federal funds and gave , in premeditation ,deliberately false signed assurances on official forms demanding full truth and honesty in letter and SPIRIT . Felony fraud. Whether he, as a member of various boards of directors (including Com Dev , military contracts with U.S. Federal government) or Trevor Eyton of Brascan, or RIM, or others lobbied , and/or offered monies to the U.S. Government , including former President Bill Clinton does not change the FACT that he lied for federal funds : felony fraud. Whoever caused the U. S. Inspector General's Office and personnel under the PHS and DOJ to obstruct justice to cover up the felony , entered into a Criminal Conspiracy as defined under the law. And we must use historical precedent to determine to just what extent this

went. Former President Bill Clinton is ON THE RECORD for stating , “I did not inhale,” and “I did not have sex with that woman.” So the serious allegation that the President of the United States may have been lobbied to cover up fraud must be reviewed in such a historical context. And as such , DEMANDS the attention of the present President of the United States, Barack H. Obama II . Anything less than a new , publicly transparent criminal investigation will be considered proof of a new criminal conspiracy to cover up in order to protect the old lobbyists. And , you, SIR, said you would not have any more of that.

\*\*\*\*\*FINISH STATEMENT\*\*\*\*\*

And the President of the United States. Barack H. Obama II has been approached on issues of the the public trust, health and safety, the law, integrity and ethics : the High Ground. It is good ground to be on and to hold. All for the Right Reasons

Thank you,

Very Sincerely,

Edward A. Greenhalgh
