***COURIER DELIVERED ***

For Public Domain

Dear Andrew Telegdi, M.P.;

Sir, you are my M.P. and once the Secretary for Human Rights under P.M. Chretien; and we have had correspondence on this matter previously: re., the University of Waterloo committed fraud and suppressed research of value to cancer, and violated my Charter Rights. Please review the letters from the FBI, Health Minister Alan Rock and the Medical Research Council of Canada. They all comment on a criminal investigation of the University of Waterloo by the RCMP. That investigation is going very slowly, in fact misconduct has been alleged.

There is a document necessary to cause the charges, and other, to move faster; an MRCC report cancelling the J.C. Carlson and J. C. M. Riley grant and describing their research in derogatory terms: i.e., SHIT!!! Please be fully aware that the University of Waterloo blocked cancer research so to commit federal fraud in order to promote SHIT!!! FACT!!! I want that document!

There are many details, but I had cancer, and refused chemo and radiation; and 9 CATScans (4 years) later am cancer free with out the harmful side effects associated with those treatments. My research, which could have followed through from 1988 and may have lead to the elimination of those treatments and reduced the medical costs to the taxpayers, was blocked so the University of Waterloo could commit fraud and evade justice. How many of your family, friends and constituents have had cancer?

Lets repeat some facts:

1. my thesis had theories valuable to cancer research
2. J. C. M. Riley's research has officially been documented as shit!

THAT, TRULY, IS OBSCENE!

I need the Medical Research Council of Canada (MRCC) document so describing the work to make it available to the public domain to cause the fraud charges to be laid, and federal inquiries to occur. Will you, in your capacity as my M.P., in view that there is evidence of legal misconduct so representation is not a question, and the concern that cancer research was blocked,

FORMALLY REQUEST IN WRITING, THE HEALTH MINISTER

ALAN ROCK, and the MEDICAL RESEARCH COUNCIL OF

CANADA RELEASE THE REQUIRED DOCUMENTS FOR THESE

LEGAL PURPOSES THAT ARE IN THE PUBLIC'S BEST INTERESTS!

I must, in all fairness seriously point out:

1. I have never lied to Canada.
2. I have promoted research of value to mankind, and not meant to kill or cause hatred against any race.
3. I have come from a working class family, not the ELITE as some, like Douglas Wright of UW believes should rule society.
4. You, M.P. Telegdi, never went out of your way to meet with me to discuss the cancer research or the Charter abuses, even though your riding office is near by.
5. My Charter and civil rights have been badly violated.

You have put your seat in Parliament on the line for a Mr. Oberlander
Who:

1. lied to Canada.
2. belonged to a Nazi death squad company ; not just regular army.
3. is a wealthy businessman.
4. and, no doubt, you have probably met him in person to discuss his concerns. Since you are willing to put your seat on the line.

Sir, either you are honest in your commitment to the Charter; or frankly, see personal benefit from helping a wealthy business man. IF YOU ARE HONESTLY COMMITTED TO THE CHARTER AND HUMAN RIGHTS, then I expect you will formally ask the Health Minister, Alan Rock and MRCC to release the documents in question to me so I may, finally, see JUSTICE!!!

I MUST REPEAT, YOU WILL PUT YOUR SEAT IN PARLIAMENT
ON THE LINE FOR A FORMER NAZI, BUT DO NOTHING WHEN CANCER
RESEARCH IS BLOCKED SO FRAUD MAY BE COMMITTED!

If you are honest, you will request the documents so they may be used to seek justice.

When may I expect to see a copy of your formal request?

Please realize that all material is to be made public domain. This matter has gone on too long, and the internet may be the only method to see justice.

Thank you,

Very truly,

Edward A. Greenhalgh.

Dear Mr. Greenhalgh:

As your M.P., I would like to point out to you that in recent months I have been seeking amendments to Bill C-16 (*The Citizenship Act*) which contains provisions that deprive Canadian citizens of due process as guaranteed them under the *Charter of Rights and Freedoms* as well as under the system of law and justice that we and our forebears have lived under for centuries.

I am not and have not been promoting the cause of any individual nor commented on any particular case other than to decline to comment. It would not be appropriate for me to do otherwise. I am not a judge nor would I be qualified to be one. As an M.P., my job is to represent my constituency and constituents in Parliament. In that capacity, I am able at times to assist individuals who have encountered difficulties in dealing with public agencies.

In your case, I see no grounds for my involvement, since it involves the internal workings of MRCC and is not a parliamentary issue. Further, as the correspondence you sent me indicates, there is an investigation under way and this is another reason why political interference is inappropriate.

Under normal circumstances, to obtain a document such as the one you wish, a citizen would submit a request to the Privacy Co-Ordinator at MRCC. I enclose some copies of information that may be useful to you in obtaining the document you want.

Yours truly,

Andrew Telegdi, M.P.
Kitchener-Waterloo

Medical Research Council of Canada

General Information

Background

The Medical Research Council of Canada is a corporation established by the Medical Research Council Act. Its objective as stated in the Act is to help attain the quality and scale of research in the health sciences essential to the maintenance and improvement of health services. To this end the Council has established a number of types of grants (to support research), awards (to support individuals) and special programs for which individuals may make applications for consideration in peer-reviewed competitions. The personal information in the banks in this chapter consists mainly of assessments of applications obtained by the Council in the peer review process. For grants and special programs, access to this personal information is automatic, that is, copies of all review reports are sent to the applicant along with notification of the Council's decision. For awards, access is available on request, either informally, by letter, or by submission of the Privacy Access Request Form to the Privacy Coordinator.

Responsibilities

According to the Medical Research Council Act, the Council's mandate is to promote and support health sciences research in Canada by funding research carried out primarily in faculties of medicine, dentistry, and pharmacy, as well as in affiliated institutions and hospitals. The Medical Council is accountable to Parliament through the Minister of National Health and Welfare.

Legislation

- Medical Research Council Act, R.S.C., c. M-9 amended 1976-77, c. 24, 34
- Queen Elizabeth II Canadian Research Fund Act, R.S.C. 1970, c. 0-1

Organization

The Council comprises a full-time president, who is also the chief executive officer, and 21 members, representative of the scientific and lay communities, who serve without remuneration and are appointed by the Governor in Council. Council meetings are held three times a year to discuss policy issues and to review and approve all program funding.

Executive Committee

The Executive Committee comprises seven Council members including the president and the vice-president. It carries out executive powers and functions under delegation from Council. There are usually five meetings each year. The Council also has standing committees assist in formulating policies and procedures for priorities and planning, research and personnel funding, affairs, and ethics in experimentation.

Recommendations on grants and awards to be funded

are made follow an extensive examination of applications through a process of peer review. This peer review process consists of 24 grant and 12 award committees with a total membership of over 340 working scientists drawn chiefly from universities.

Secretariat

The Secretariat of the Council consists of 64 employees located in Ottawa. It is under the direction of the president and is divided into six responsibility areas.

Office of the President:

Includes the Secretary to Council.

Programs Branch:

Responsible for the delivery of programs approved the Council.

University-industry Programs:

Responsible for the delivery of university-industry programs approved by the Council.

Corporate Management:

Responsible for the provision of central services financial, personnel, administrative and computer services.

Scientific Evaluation:

Responsible for administering the peer review process including site visits and ensuring the process is reflective of the policies and objectives of Council.

Communications Branch:

Responsible for all aspects of public information; including strategy development, public and media relations and a publications program for the Council.
