

## 8.Howard Hughes Medical Foundation Research Proposal

These are the emails sent to the Hughes Foundation. You are asked to review them in their sincerity to develop the research to help society. Please recall that when Mr. Hughes was alive in his prime he would spare no expense to achieve an end. If you saw the Aviator, then you know he re-shot the movie, Wings” because it had been a silent movie and sound had just developed and he was cutting edge. He succeeded, and I had honestly expected his Foundation to be a little daring, especially in light of the small amount of research funding I was asking (approx. 50 to 100 thousand dollars). I had expected at the very least a reply. However, review the material and see what you think you would have done.

19 July 2004 , Dear Dr.Cech and the Hughes Foundation,

Your programs were described on CBS, and your website states biology will lead to many great discoveries to change the world. Dr. Cech's own work with RNA not needing a protein intermediary protien could lead to a new origin of life was described, and is why I am contacting you. My own research, the Viroid Thermodynamic Theory on the Origin of Life (V.T.T.) is just that , and dates back to 1987! On the same tv program , one of your funded researchers (modestly) described himself as a Galileo. Please recall that Galileo was mistreated as a heretic by the establishment( who did not disbelieve him, they just didn't want their power challenged). Important research (especially if you want to help people with cancer ) must challenge small minded petty people in power.

Is the Hughes Foundation above small minded pettiness?Dr.Cech, how would you deal with Galileo today? Would you help him?I am asking for help to continue the research. In 1987 I discovered the Cell Death (Gene) Signal to tell tumours to die. I was suppressed so academic fraud could be covered up. Cell Death Signal Theory developed into VTT, which has grown to encompass the creation of new diseases, which Noam Chomsky said "could be of phenomenal importance." Go to my website, [www.cancerfraudbadbiotech.com](http://www.cancerfraudbadbiotech.com) to see the quote. Also note the fmr US Surgeon General Regretted my treatment. And Dr.James Lovelock , GAIA theory (Coombe Hill letter) said kind words too.

Also note, I had cancer like Lance Armstrong, but turned down chemo and radiation to apply my own theories, and 20 plus catscans later am cancerfree without the secondary tumours Mr.Armstrong suffered. There are many potential medical discoveries just waiting to be found if I can find a bright person to help. And about being bright, Dr.Cech, you have won many awards, but you must also be aware of the dark side of science. My detractors had their work officially described in derogatory terms, and had to plagiarize my research to get their grants back. See my website so you can judge the quality of my work and the incredible odds I've had to overcome. Then ask yourself, " Isn't this the very type of person the foundation was meant to help ?" I look forward to your reply. Thank you. Edward A.Greenhalgh

v21 July 2004, Dear Dr.Cezh and Hughes Foundation,

I am respectfully requesting a reply to my earlier email . Please note, Sec. Tommy Thompson of HHS announced today a government bioterrorism program, and if you read my website, [www.cancerfraudbadbiotech.com](http://www.cancerfraudbadbiotech.com) and my emails and courier letters to him and Congress, I believe you will agree my efforts probably contributed to the governments awareness of the problem. There is a cancer in science right now, many corrupt researchers and many others who do not want to deal with the problem . You may be one. If you are not, then , like my efforts to your (and my government) my work will cause important changes, but I need help. If the Hughes Foundation can understand the benefits my honest persistence can bring about with public awareness, then you will help me. I would like a grant to finish VTT on paper as a book ( like Margaret MacMillan was funded to produce her book Paris 1919).The foundation from this will springboard my own practical research while forcing others to deal with concepts they have been avoiding. Remember , your government wanted to avoid the 911 warnings from good people before. Science was once more open with the spreading of new theories considered important;

corruption has changed that. I hope you will agree with me, but, if you are closed to the subject, a brief reply would be courteous. Please note my early research proposals on telling tumours to die (1988) the Mayo Clinic is only doing it now, but I believe my efforts have caused cancer research to move in good directions. More can be done, but I need good people to help me. Thank you . Edward A. Greenhalgh

29 July 04, Dr. Dr. Cech and HHMI, I have not received a brief reply. I am left to assume that you could not handle the seriousness of my work. Please note, the 911 Commission has found that your government could not handle the seriousness of the terrorist threat. My research is to prevent harm due to corrupt science. That you can not believe , or worse, will accept corruption in science leaves the world open to serious biological threats ; that can be prevented. By hiding from the problem , or accepting researchers whose work is described derogatory terms by the government can only assure the harm will follow. You could be a very positive force to prevent harm, but you must be willing to take a hard look at what will cause the harm . That is the only way to prevent it. Howard Hughes, for all his faults, did not back down from controversy. You do his legacy a disservice by turning your back on this one. A brief reply , no matter if it is not to fund , would be the brave and polite thing to do. Thank you . E.A.Greenhalgh

Dr. Cech's RNA and New Origin of Life reply request EAGreenhalgh and VTT
